

# FISCAL PROFILES, 2004

## CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

---

## Summary

This report contains and analyzes statistical information about the financing of California post-secondary education from the 1965-66 fiscal year through 2004-05. In addition, there is information on California public elementary and secondary education financing as well as State government in general. The Commission compiles, disseminates and analyzes this information to provide policy makers with comprehensive and comparable financial data that can be used in comparative analysis of higher education finance issues. This document also provides an efficient and accurate response to the many questions that the Commission receives each year.

This report, the thirteenth in the series, retains the formatting and structure of prior years. Because of publication timelines, some of the data shown for the current fiscal year are estimates at this point. They will be replaced with actual data when the budget is finalized.

Major highlights in the report include the following:

- ♦ Total State General Fund spending in California is \$79 billion in 2004-05, an increase of \$3 billion over the January Budget's proposed \$76.1 billion. Including more than \$26 billion in selected State Special Funds, the total proposed State budget for 2004-05 is estimated to be more than \$105 billion;
- ♦ State General Funds plus Local Property Tax revenues for the state's three public higher education systems increases by \$454 million over last year (4.6%); and
- ♦ 2004-05 higher education funding is anticipated to increase by \$454 million in combined State General Fund and local funds over 2003-04, mostly concentrated in the community colleges, which are anticipated to receive \$418 million more in 2004-05 than in 2003-04. Thus, the net effect for funding for the remainder of higher education in 2004-05 is minimal. Another round of increases in State University and University of California student fees will partially offset this shortfall.

The report documents that the 2004-05 budget for the State of California represents the third "recession-era" budget in a row. General Fund spending proposed for 2004-05 is more than \$2 billion lower than in 2000-01. The spending level is lower than what would occur with normal caseload growth in service populations.

The report concludes that California's higher education systems face many challenges over the next several years. Chief among these are increasing enrollment pressures and the need to improve both the persistence and graduation rates of students.

This report was transmitted to the Commission at its September 7 – 8, 2004, meeting and was finalized in December 2004. Additional copies may be obtained on the Internet from the Commission's website. Please visit the Commission's homepage -- [www.cpec.ca.gov](http://www.cpec.ca.gov) -- for further information. Please check the website, as updates to the report will periodically be posted electronically. Questions about the substance of the report may be directed to Kevin Woolfork of the Commission at (916) 322-8007 (voice) or by electronic mail at [kwoolfork@cpec.ca.gov](mailto:kwoolfork@cpec.ca.gov).

## 31 | PROFILES

### *State General Fund Appropriations*

#### *Display*

- |    |  |
|----|--|
| 1. | State General Fund Expenditures in the Nine Budget Categories for State Operations and Local Assistance, for Fiscal Years 1967-68 Through 2004-05  |
| 2. | State General Fund Expenditures in the Nine Budget Categories for State Operations and Local Assistance, as Percentages of Total State General Funds, for Fiscal Years 1967-68 Through 2004-05 |
| 3. | Annual Percent Changes in State General Fund Expenditures in the Nine Budget Categories for State Operations and Local Assistance, for Fiscal Years 1968-69 Through 2004-05                    |
| 4. | Personnel Years (PYs) for the State's Five Combined Budget Expenditure Categories and Proportions of Total PYs, for Fiscal Years 1967-68 Through 2004-05                                       |
| 5. | Salary Costs for the State's Five Combined Budget Categories, and Proportions of Total Salary Costs, for Fiscal Years 1967-68 Through 2004-05  |
| 6. | State General Fund Appropriations for State Government Functions, State Operations, and Local Assistance in Actual and 2004-05 "Constant Dollars," for Fiscal Years 1967-68 Through 2004-05    |
-

### *The Total State Spending Plan*

7. “Major,” “Minor,” and “Loan and Transfers” Revenue Sources for the State General Fund, with Annual Percent Changes and Proportions of Total Funds, for Fiscal Years 1965-66 Through 2004-05
  8. Appropriations in the State of California’s Five Major Funding Categories, with Annual Percent Changes, by Source, and Annual Percent Changes for Total Appropriations, for Fiscal Years 1965-66 Through 2004-05
  9. Annual Percent Changes in the State of California’s Five Major Funding Categories and the Percentage of Total Appropriations Represented by Each Fund Source, for Fiscal Years 1965-66 Through 2004-05
  10. Appropriations in the Five Major Funding Categories Used for the Operation of California State Government, in Actual and 2004-05 “Constant Dollars,” for Fiscal Years 1965-66 Through 2004-05
  11. Summary of Proposition 98 Funding for Public K-12 Education, the California Community Colleges, and Other Funded Entities -- “Funding Guarantee” Basis -- for Fiscal Years 1988-89 Through 2004-05
  12. The State Appropriation Limit (SAL), for Fiscal Years 1978-79 through 2004-05
- 

### *Funding per Unit of Full-Time-Equivalent Student Enrollment*

13. University of California State General Funds and Combined State General Fund and Systemwide Student Fee (SSF) Revenues Per Full-Time-Equivalent Student (FTES), for Fiscal Years 1965-66 Through 2003-04 (Proposed: 2004-05)
14. California State University State General Funds and Combined General Fund and Systemwide Student Fee (SSF) Revenues Per Full-Time-Equivalent Student (FTES), for Fiscal Years 1965-66 Through 2004-05
15. California Community Colleges State General Funds and Combined General Fund, Local Revenues, and State Enrollment Fee Revenues Per Full-Time-Equivalent Student (FTES), for Fiscal Years 1965-66 Through 2004-05
16. Average Revenues Per FTE Student for Instruction-Related Activities in Actual and 2003-04 “Constant Dollars” for the University of California, for Fiscal Years 1980-81 Through 2003-04
17. Average Revenues Per FTE Student for Instruction-Related Activities in Actual and 2003-04 “Constant Dollars” for the California State University, for Fiscal Years 1980-81 Through 2003-04
18. Average Revenues Per FTE Student for Instruction-Related Activities in Actual and 2003-04 “Constant Dollars” for the California Community Colleges

- 18a. | Average Revenues Per FTE Student for Instruction-Related Activities in Actual and 2002-03 “Constant Dollars” for Selected AICCU Institutions, for Fiscal Years 1979-80 Through 2002-03
- 

*Appropriations of Funds for California Higher Education*

19. | State General Fund Appropriations for Current Operations of California’s Three Public Systems of Higher Education, Including Local Revenues for the Community Colleges, for Fiscal Years 1965-66 Through 2004-05
20. | Annual Percent Changes in State General Funds, and Local Revenues for California’s Three Public Postsecondary Education Systems, for Fiscal Years 1966-67 Through 2004-05
21. | University of California Fund Sources for Current Operations for Fiscal Years 1967-68 Through 2002-03 (Estimated: 2004-05)
22. | University of California Fund Sources for Current Operations as a Percentage of Total Funds, with Annual Percent Changes in Total Funds, for Fiscal Years 1967-68 Through 2002-03 (Estimated: 2004-05)
23. | University of California Fund Sources for Organized Research, Except for Department of Energy Laboratories, and Annual Percent Changes, for Fiscal Years 1965-66 Through 2002-03
24. | California State University Fund Sources for Current Operations for Fiscal Years 1967-68 Through 2004-05
25. | California State University Fund Sources for Current Operations as a Percentage of Total Funds, with Annual Percent Changes in Total Funds, for Fiscal Years 1967-68 Through 2004-05
26. | California Community Colleges Fund Sources for Current Operations for Fiscal Years 1965-66 Through 2004-05
27. | California Community Colleges Fund Sources for Current Operations as a Percent of Total Funds, with Annual Percent Changes in Total Funds, for Fiscal Years 1965-66 Through 2004-05
28. | Annual Percent Changes in Major Sources of Current Operations Funds for California’s Three Public Systems of Postsecondary Education, for Fiscal Years 1966-67 Through 2004-05
- 

*Categories of Expenditures for the Systems*

29. | University of California General Purpose Expenditures in Program Categories for Fiscal Years 1966-67 Through 2002-03 (Estimated: 2004-05)
30. | University of California General Purpose Expenditures in Program Categories as a Percentage of Total Expenditures, with Percent Changes in Totals, for Fiscal Years 1966-67 Through 2002-03 (Estimated: 2004-05)

31. California State University General Purpose Fund Expenditures in Seven Program Categories, for Fiscal Years 1967-68 Through 2004-05
  32. California State University Expenditure in Program Categories as a Percentage of Total Expenditures, with Percent Changes in Expenditure Totals, for Fiscal Years 1967-68 Through 2004-05
  33. California Community Colleges' State Operations and Local Assistance General Purpose Funding by Expenditure Category, with Proportions for Each Category, for Fiscal Years 1967-68 Through 2004-05
- 

### *Student Tuition and Fee Charges and Revenues*

34. Systemwide Resident Student Fee Revenues from California's Three Public Higher Education Systems, for Fiscal Years 1965-66 Through 2004-05
  35. Revenues from Nonresident Tuition and Total Student Fee Charges at California's Three Public Higher Education Systems, for Fiscal Years 1965-66 Through 2004-05
  36. Annual Undergraduate Resident Student Fees and Nonresident Tuition of California's Three Public Higher Education Systems for Fiscal Years 1965-66 Through 2004-05
  37. Systemwide and Total Annual Resident Undergraduate Student Fee Charges at California's Three Public Higher Education Systems with Percent Changes, for Fiscal Years 1965-66 Through 2004-05
  38. Percent Changes in Systemwide and Total Student Fees at California's Three Public Higher Education Systems, and in Selected Price Indices and California Personal Income for Fiscal Years 1966-67 Through 2004-05
  39. Systemwide and Total Resident Undergraduate Student Fee Levels, in Actual and 2004-05 "Constant Dollars" at California's Three Public Higher Education Systems, for Fiscal Years 1965-66 Through 2004-05
- 

### *State Financial Aid*

40. Cal Grant A, B, and C Student Financial Aid Programs' Total Funding by Source, with Annual Percent Changes and Proportions of Total Funds, for Fiscal Years 1968-69 Through 2004-05
41. Numbers of New and Total (Including Renewals) Cal Grants A, B, C, and T Awards, for Fiscal Years 1968-69 Through 2004-05, with Annual Change in the Total Number of Awards
- 41a. All New and Renewal Cal Grant Awards by Program and Funding, for Fiscal Years 2001-02 Through 2003-04

- 42. Cal Grants A, B, C, and T Programs' Maximum Dollar Amount per Award, with Annual Percent Changes in Total Award Levels, for Fiscal Years 1968-69 Through 2004-05
  - 43. Number of Student Loans and Loan Dollar Totals Guaranteed by CSAC, by Education Sector, for Fiscal Years 1978-79 Through 2002-03
- 

### *Capital Outlay Funds*

- 44. University of California Sources of Funds for Capital Outlay with State Plus Federal Fund Totals, for Fiscal Years 1965-66 Through 2003-04 (Estimated: 2004-05)
  - 45. University of California Sources of Funds for Capital Outlay as Percentages of Total Capital Outlay Funds, with "State and Federal" Funds Annual Percent Changes, for Fiscal Years 1965-66 Through 2003-04 (Estimated: 2004-05)
  - 46. California State University Sources of Funds for Capital Outlay and Total Annual Percent Change, for Fiscal Years 1965-66 Through 2004-05
  - 47. California State University Sources of Funds for Capital Outlay as Percentages of Total Capital Outlay Fund for Fiscal Years 1965-66 Through 2004-05
  - 48. California Community Colleges' Sources of Funds for Capital Outlay and Total Annual Percent Change for Fiscal Years 1965-66 Through 2004-05
  - 49. California Community Colleges' Sources of Funds for Capital Outlay as Percentages of Total Capital Outlay Funds for Fiscal Years 1965-66 Through 2004-05
- 

### *Independent Institutions in California and the Nation*

- 50. Number and Amounts of Grants/Fellowships Awarded to California Independent Colleges and Universities, for Fiscal Years 1976-77 Through 2004-05
- 51. Relative Value of Cal Grant Maximum Awards in Relation to Independent College Tuition and Fees, for Fiscal Years 1980-81 Through 2003-04
- 52. Current Fund Revenues in California Independent Colleges and Universities, for Fiscal Years 1979-80 Through 2002-03
- 53. Current Fund Revenues in California Independent Colleges and Universities as Percentages of Total Revenues, For Fiscal Years 1979-80 Through 2002-03
- 54. Enrollments, Tuition Revenues, and Weighted Average Tuition for California Independent Colleges and Universities for Fiscal Years 1970-71 Through 2002-03

- |     |  |
|-----|--|
| 55. | Education and General (E&G) Expenditures in California Independent Colleges and Universities for Fiscal Years 1979-80 Through 2002-03                              |
| 56. | Education and General (E&G) Expenditures in California Independent Colleges and Universities, in Percentages, for Fiscal Years 1979-80 Through 2002-03             |
| 57. | Instruction-Related (I-R) Expenditures for California Independent Colleges and Universities, with Annual Percent Changes, for Fiscal Years 1979-80 Through 2002-03 |
| 58. | State Appropriations to Independent Colleges and Universities in 35 States, for Fiscal Years 1984-85 Through 2002-03   |
| 59. | Annual Percent Change in State Appropriations to Independent Colleges and Universities in 35 States, for Fiscal Years 1985-86 Through 2001-02                      |
| 60. | Undergraduate, Graduate, and Professional Headcount and FTE Enrollment in the Independent Colleges and Universities in 30 States, for Fall 2002                    |
- 

*Enrollments in California Public Postsecondary Education*

- |     |   |
|-----|---|
| 61. | Total Enrollment for California's Three Public Systems of Higher Education, Headcount and Full-Time-Equivalent Student (FTES) Enrollment, for Fiscal Years 1965-66 Through 2004-05  |
| 62. | Annual Percent Changes in Headcount and Full-Time-Equivalent Student (FTES) Enrollment in California's Three Public Systems of Postsecondary Education for Fiscal Years 1966-67 Through 2004-05                           |
| 63. | University of California Full-Time-Equivalent Student (FTES) Enrollment by Student Level, for Fiscal Years 1965-66 Through 2002-03 (Estimated: 2004-05), with Percent Changes in Non-Health Sciences and Total Enrollment |
| 64. | California State University Full-Time-Equivalent Student (FTES) Enrollment by Level and California Community College FTES Enrollment by Funding Source or Status, for Fiscal Years 1965-66 Through 2004-05                |
- 

*Price (Inflation) Indices, Income Growth, and System Financial Support*

- |     |   |
|-----|---|
| 65. | Annual Percent Changes, Index Values and 2004-05 Calculated Inflation Factors for the Three Major National Implicit Price Deflators, for Fiscal Years 1965-66 Through 2004-05   |
| 66. | Annual Percent Changes, Index Values, and 2004-05 "Constant-Dollar" Inflation Factors for the U.S. and California Consumer Price Indices and California Personal Income, for Fiscal Years 1965-66 Through 2004-05         |
| 67. | Annual Percent Changes, Index Values, and 2004-05 "Constant-Dollar" Inflation Factors for the Higher Education, Research and Development, and Boeckh Construction Price Indices, for Fiscal Years 1965-66 Through 2004-05 |

---

*Actual and Constant-Dollar State-Determined Funds*

- |     |  |
|-----|--|
| 68. | Annual Percent Change in Selected Inflation Indices, Major Segmental Funds, Faculty Salary Information, and Total H. E. State General Fund Expenditures, for Fiscal Years 1965-66 Through 2004-05                                |
| 69. | Annual Proportions of "State Determined Funds," by Source, for California's Three Public Postsecondary Education Systems, for Fiscal Years 1965-66 Through 2004-05   |
| 70. | University of California Selected Sources of Funds for Current Operations in Actual and 2004-05 "Constant Dollars" for Fiscal Years 1967-68 Through 2003-04 (Estimated: 2004-05)   |
| 71. | University of California Revenues per Full-Time-Equivalent Student for Current Operations, from Selected Sources of Funds in Actual and 2004-05 "Constant Dollars" for Fiscal Years 1967-68 Through 2003-04 (Estimated: 2004-05) |
| 72. | California State University Selected Sources of Funds for Current Operations in Actual and 2004-05 "Constant Dollars" for Fiscal Years 1967-68 Through 2004-05   |
| 73. | California State University Revenues per Full-Time-Equivalent Student for Current Operations, from Selected Sources of Funds in Actual and 2004-05 "Constant Dollars" for Fiscal Years 1967-68 Through 2004-05                   |
| 74. | California Community Colleges Selected Sources of Funds for Current Operations in Actual and 2004-05 "Constant Dollars" for Fiscal Years 1967-68 Through 2004-05   |
| 75. | California Community Colleges Revenues per Full-Time-Equivalent Student for Current Operations, from Selected Sources of Funds in Actual and 2004-05 "Constant Dollars" for Fiscal Years 1967-68 Through 2004-05                 |

---

*Hastings College of the Law and Public School Support*

- |     |  |
|-----|--|
| 76. | Hastings College of the Law, Enrollments, Student Charges, and Funding with Annual Percent Changes for Resident Student Fees and Fund-Source Totals, for Fiscal Years 1965-66 Through 2004-05    |
| 77. | California Public K-12 Education Major Revenue Sources for State Operations and Local Assistance, for Fiscal Years 1965-66 Through 2004-05   |
| 78. | California Public K-12 Education Annual Average Daily Attendance (ADA), Including Adult Education and Continuation Education Programs, for Fiscal Years 1965-66 Through 2004-05                  |
| 79. | California Public K-12 Education Combined State Aid Appropriations and Total State and Local Appropriations per Unit of Average Daily Attendance (ADA), for Fiscal Years 1965-66 Through 2004-05 |

---

### *Per-Capita Spending in California Public Education*

- |     |   |
|-----|---|
| 80. | Per-Capita State Appropriations and Total State and Local Appropriations to California Public K-12 Education, for Fiscal Years 1965-66 Through 2004-05  |
| 81. | Per-Capita State Fund Appropriations and Combined State and Systemwide Student Fee Revenues of the University of California for Fiscal Years 1965-66 Through 2004-05  |
| 82. | Per-Capita State Fund Appropriations and Combined State and Systemwide Student Fee Revenues of the California State University for Fiscal Years 1965-66 Through 2004-05   |
| 83. | Per-Capita State Fund and Local Fund Appropriations and “Combined” State, Local, and Student Funds (S / L / S) for the California Community Colleges for Fiscal Years 1965-66 Through 2004-05                               |
| 84. | Per-Capita “Combined” Fund Appropriations for K-12 Education and California’s Three Public Higher Education Systems, with System’s Proportions of Total Per-Capita Appropriations, for Fiscal Years 1965-66 Through 2004-05 |
| 85. | Per-Capita Appropriations of State General Funds for California’s Five Major State Budgeting Categories, with Each Category’s Proportion of Total Per-Capita Appropriations, for Fiscal Years 1966-67 Through 2004-05       |
| 86. | Calculations of California Per-Capita Personal Income, for Fiscal Years 1965-66 Through 2004-05   |

---

### *Education Funding and Enrollments in Comparison to State Funding and Population Growth*

- |     |   |
|-----|---|
| 87. | Comparisons of Annual Percent Changes in “Caseload” Funds for Selected Entities -- With Spending for Each Service Area Divided by that Area’s Service Population, for Fiscal Years 1965-66 Through 2004-05  |
| 88. | State Population and Headcount Enrollment in California’s Four Public Education Systems, for Fiscal Years 1965-66 Through 2004-05   |
| 89. | Percentages of California’s Population Represented by Headcount Enrollment in California’s Four Public Education Systems for Fiscal Years 1965-66 Through 2004-05   |
| 90. | Comparisons of Overall State General Fund (SGF’s) Appropriations to Local Appropriations plus SGF’s in the State’s Three Public Higher Education Systems and of Changes in California’s Population to the Systems’ Combined Headcount Enrollments, for Fiscal Years 1965-66 Through 2004-05 |

---

*National Comparative Higher Education Appropriations and Expenditures*

- |     |   |
|-----|---|
| 91. | Per-Capita State and Local Government Expenditures of State and Federal Funds for Higher Education in the Nation's Seven Most Populous States, and the 50-State Average, for Fiscal Years 1966-67 Through 2001-02   |
| 92. | Annual Percent Changes in Per-Capita State and Local Government Expenditures of State and Federal Funds for Higher Education in the Nation's Seven Most Populous States, and the 50-State Average, for Fiscal Years 1967-68 Through 2001-02                                 |
| 93. | Rankings of Per-Capita State and Local Government Expenditures for Higher Education in the 30 Most Populous States with Cumulative Average Expenditures, for Fiscal Years 1986-87 Through 2001-02   |
| 94. | State Appropriations for Ongoing Higher Education Operations in the Nation's 35 Most Populous States and the Nation for Fiscal Years 1979-80 Through 2004-05  |
| 95. | Percent Changes in State Appropriations for Ongoing Higher Education Operations in the Nation's 35 Most Populous States and the Nation, for Fiscal Years 1980-81 Through 2004-05  |
| 96. | Higher Education General Funds for Current Operations in the "Megastates," with Annual and Cumulative Percent Changes, for Fiscal Years 1979-80 to 2004-05  |
| 97. | State General Fund Appropriations for Operating Expenses of the University of California, the California State University, and the Public Higher Education Institutions Used for Faculty Salary Comparisons, with Percent Changes, for Fiscal Years 1989-90 Through 2003-04 |
| 98. | Fifty-State Summary of State General Fund Appropriations to Higher Education, with Yearly Dollar Changes and Annual and Biennial Percent Changes, with Annual Percent Changes in Two National Price Indices, for Fiscal Years 1965-66 Through 2004-05                       |

# Introduction

---

*FISCAL PROFILES 2004* is the thirteenth in a series of annual reports by the California Postsecondary Education Commission of statistical information on the financing of the State's public higher education institutions. It also includes selected financial and enrollment information on public elementary and secondary education, and on California's independent higher education institutions.

---

## **Executive summary**

After publication of this report, the Legislature and Governor passed a budget for the current 2004-05 fiscal year. This update relies on information published in the Governor's Proposed 2004-05 Budget, the May Revision to the 2004-05 Budget, and the final 2004 budget as adopted and signed into law. This information is supplemented by other updates available from legislative and administration sources. The information shown for earlier years comes from the affected higher education segments and other data providers.

The reader is cautioned that the information and analyses presented for the most recent years in this initial iteration of Fiscal Profiles, 2004 is based upon budgeted totals for 2004-05. During the course of the year actual allocations will vary from these totals.

The Governor's revised 2004-05 budget includes \$79 billion in State General Fund spending, an increase of \$3 billion over the January Budget's proposed \$76.1 billion. Including more than \$26 billion in selected State Special Funds, the total proposed State budget for 2004-05 will be more than \$105 billion.

The proposed 2004-05 budget for the State of California represents the third "recession-era" budget in a row. General Fund spending proposed for 2004-05 is more than \$2 billion lower than in 2000-01. The budget seeks to force spending below what would occur with normal caseload growth in service populations. Total State General Fund spending in California is \$79 billion in 2004-05, a slight increase above the prior two years. Total State government-authorized spending (State Spending Plan) is estimated to increase by \$1.2 million in the current year, or only half of one percent.

For California higher education, the proposed 2004-05 State budget, as of the May Revise, includes nearly \$11 billion in combined State General Funds and local property tax revenues. These combined State and Local funds for the state's three public higher education systems increases by \$454 million over the past year (4.6%). Of these funds, the California

Community Colleges are anticipated to receive \$418 million more in 2004-05 than in 2003-04.

For higher education, the proposed 2004-05 budget is tied to future budgets through a 7-year Compact entered into by the Governor with the California State University and the University of California. The major components of the Compact are summarized below:

- Annual increases in State General Fund support of 3% in 2005-06 and 2006-07, 4% in 2007-08, and 5% in 2008-09 through 2010-11;
- 2.5 percent annual enrollment growth funding, (approximately 5,000 full-time-equivalent students at UC and 8,000 full-time-equivalent students (FTES) at CSU);
- Undergraduate student fee increases of 14% in 2004-05, and no more than 8% in 2005-06 and 2006-07 (increased only if fiscal conditions dictate), with 20% to 33% of the fee revenues to be used for institutional financial aid;
- Partial restoration of academic preparation funding (\$12 million in UC and \$46 million in CSU), using non-state resources; and
- Annual statistical reporting of outcomes information in areas including: enrollments, persistence and graduation rates, time-to-degree, student-to-faculty ratio, new transfer students, and systemwide office administrative funding.

While the Compact proposed increased funding for the out-years, the current year General Fund budgets of the State University and University of California are both projected to be lower than in 2003-04. Another round of increases in systemwide student fees in the State University and University of California will partially offset this funding shortfall.

For K-12 Education, the Governor's May Revision proposed to increase the Proposition 98 funding guarantee by \$542 million for the 2003-04 and 2004-05 two-year period over what was proposed in January. This increase is lower than would otherwise occur under the complicated Proposition 98 calculation formulas. The Governor and the K-12 education community had earlier agreed to reduce the Proposition 98 guarantee for 2004-05 by \$2 billion.

While the 2004-05 State budget has not yet ended, there are estimates that even if it is balanced, the State will face another budget deficit in the range of \$5 - \$6 billion next year. The Governor and Legislature are debating some significant spending reductions in some areas of government. In addition, the Governor's soon-to-be-released "California Performance Review" is expected to call for some major overhauls of state government functions in order to generate efficiencies in public sector operations.

Even with the future-year funding pact entered into by the State University and University of California, and the community colleges being covered under Proposition 98, California's higher education systems face many challenges over the next several years. Chief among these are increasing enrollment pressures and the need to improve both the persistence and graduation rates of students.

The State's latest economic recession has underscored the dilemma facing policymakers of attempting to plan for steadily increasing public expenditures while relying upon unstable public revenue generation. Many State-funded programs, such as K-12 Education, corrections, and health and human services, have annual expectations for increased caseloads nearly every year. This is sometimes in conflict with limited State resources as tax revenues grow and shrink depending upon factors that have nothing to do with program caseload.

The fiscal situation for cities, counties, and special districts is just as challenged and they have less flexibility than the State. These local governmental entities are generally among the first to be impacted by economic downturns on both the revenue (decreased tax receipts) and expenditures (increased demand for social services) sides. And, often during recessions, the State will claim some revenues that usually belong to local governments.

Through separately negotiated agreements and ongoing legislative deliberations, the Governor is attempting to address present and future funding issues with a host of entities -- K-12 Education, the State University and University of California, local governments, Native American gaming representatives, and others. These agreements are intended to inject some level of stability into future State financial decisions. However, given the variability this decade of tax and fee revenues, the true impact of these and other suggested policy and operations changes in the public sector will be difficult to predict.

---

**Background**

The chart on the following page shows the cumulative percent change, by major expenditure category, of State General Fund expenditures over the past 14 years (data from 1990-91 through 2004-05). The five smaller budget categories - "Legislative, Executive, Judicial," "State and Consumer Services," "Business, Transportation, Housing," "Resources," and "General Government Services" - are combined and shown under the heading "Other Government Functions." This change moderates some of the substantial fluctuations in funding levels for these individual categories over time.

As the chart shows, General Fund spending for Higher Education has increased 60%, while spending for K-12 education has grown by 139% over the past 14 years.

*Percent Change in State General Fund Expenditures This Past, Dozen Years from Fiscal Year 1990-91 through 2004-05 (est.)*

For 2004-05, the category “K-12 Education” (139%) is just behind “Corrections” (140%) as the fastest growing area of General Fund support since 1990-91. General Fund spending for “Health and Human Services” (90%) is the fourth highest category, behind Total General Fund spending (96%) over this time. General Fund spending for “Other Government Functions” has decreased (13%) since 1990-91. However, this category includes large proposed initiatives that often change significantly between what is anticipated in the budget and what actually occurs when spending for that year is determined.

General Fund spending for the category “Higher Education” has increased only 60% between 1990-91 and 2004-05. This rate of change is depressed, in part, due to recent-year reductions in State General Funds for higher education. This trend also points to the fact that higher education funding has become less General Fund dependent over time.

The chart on the next page shows percentage points changes in the proportion, or share, of total public funds represented by each of four “State-determined funds” – defined as funds over which either the State or the education systems themselves have policy control for the Community Colleges, the State University, and the University of California.

For the California Community Colleges, the relative proportions of its State-determined funds sources have changed little since 1986-87, and in ways consistent with the other two public systems. The community colleges’ largest funding source, State General plus Local Property Tax revenues, has declined three-tenths of one percent over this time. Lottery and State School Funds have also declined as shares of total funding. The largest change over the eighteen years is 3.2 percentage point increase in systemwide student fee revenues as a proportion of total State-determined funds. This is the largest share of total community college funding ever represented by student fee revenues. For 2004-05, combined State General and Local funds continues to account for more than 91% of the community college’s total State-determined funds (see Display 69).

At the California State University, State General Funds as a proportion of the system’s total State-determined funds has declined by 13.5 percentage points since 1986-87. As a proportion of the overall total, State General Funds now represent less than 70% of the total State-determined funds (Display 69).

---

*Changes in the Proportions of Total "State Determined Funds," by Fund Source, for the Three Public Segments of California Postsecondary Education, for Fiscal Years 1986-87 and 2004-05*

***California  
Community  
Colleges***

***California  
State  
University***

***University  
of California***

This represents an historic low in the proportion of overall State-determined funds represented by the General Fund over the 40 years of this measurement. “Net” State University Revenues (these are State University Revenues minus Systemwide Student Fee revenues, which are displayed separately here) are 1.3 percentage points higher in the current year than they were in 1986-87. Currently these funds comprise less than 6% of total State-determined funds. The State University’s Lottery revenues now represent 1.2% of the total, similar to its proportion in past years. Over the 20 years of its existence, Lottery revenues have averaged just 1.3% of total State University State-determined funds. Revenues from resident Systemwide Student Fees represent 13.1% more of the State University’s State-determined funds in 2004-05 than in 1986-87. As a share, these student fee revenues are now nearly a quarter of this total, up from the 11% of 1986-87. In the past and current fiscal year, student fees have accounted for the highest proportion of total State University State-determined funds in 40 years (see Display 69).

At the University of California, State General Funds as a proportion of total State-determined funds have dropped by more than 22 percentage points since 1986-87. General University funds (nonresident tuition and miscellaneous student and institutional revenues), as a proportion of the total, have increased by 4%; these funds now represent 12% of the total. The proportion of the total represented by Lottery funds at the University has declined by six-tenths of one percent since 1986-87 and remains steady at 0.5% of total State-determined funds. Even more so than in the other systems, Systemwide Student Fee revenues’ share of State-determined funds has grown significantly at the University, up nearly 19 percentage points since 1986-87.

Topping last year’s growth, the increase in the share of the total shown here represented by student fee revenues is the largest measured for any State-determined fund source for any of the three systems in the 17 years of this measurement. Student fee revenues in the University now account for just under 28%, its highest total ever, as also was the case last year. At 59.8%, State General Fund’s share of total University State-determined funds is at its lowest point in the 40 years of this measurement and is now less than four-fifths of what it was just four years ago (see Display 69).

---

**Organization  
of the report**

Fiscal Profiles 2004 has 99 tabular displays – of which 90 have been updated for this report. These displays are organized under 16 major categories of information. Appendix A contains five pages of multi-year summaries of much of the data from these displays. The information presented in the displays for the immediate past fiscal year (2003-04) and the current fiscal year (2004-05) are estimates and proposals representing the most up-to-date information presently available on the varied aspects of California State government finance. This information has been compiled from, and verified by, a variety of sources, however, with the 2004-05 budget as adopted.

---

*State General Fund  
Appropriations*

Displays 1 through 3 describe overall State General Fund appropriations, shares of total spending, and annual percentage changes in nine programmatic areas the State uses to categorize its yearly-spending plan for this fund source through 2004-05. Over the past few years, some agencies formerly contained within categories – such as the California EPA and the Trade and Commerce Agency – have themselves been reclassified as stand-alone program categories. For consistency and for purposes of this analysis, they continue to be shown within their former program categories in this report.

Among the trends portrayed for 2004-05 in these displays is that the share of total General Fund expenditures represented by higher education remains below 12% (Display 2). At 11.9%, the current year's higher education share of total General Funds continues to be among the lowest measured here over the past 38 years. The three lowest such proportions of the total funding represented by higher education have all occurred within the last five years. In recent years, the diversification of higher education's funding resource base beyond the State General Fund, mostly through increases in user fees, has accelerated.

K-12 Education's share of State General Fund expenditures in preliminarily estimated to 43.7% in 2004-05. While this proportion will likely decline somewhat once a State final budget is adopted, it should still end up being among the very highest proportions overall General Fund spending ever measured here for K-12 Education.

Two years ago, the smaller expenditure categories – “Business, Housing, Transportation,” “Resources,” and “State and Consumer Services” – all showed significant one-year declines in General Funds. For 2004-05, two of the four show slight increases and the other two slight declines. The relatively small expenditure category “General Government Services” is actually projected to net a savings to the State of \$1.7 billion in 2004-05. This is nearly an \$8 billion turn-around from last year's spending in the category and highlights the volatility of budget-year spending estimates in this category. This development also highlights one of the challenges of this analysis: the impact of costly short-term activities (such as accounting for tax reductions or anticipated borrowing) and the use of the “General Government” category as a catch-all for anticipated budgetary savings or expenditures generated within other program areas in any one category.

Spending in the “Health and Human Services” and “Corrections” categories both are projected to account for greater shares of total General Fund spending in 2004-05 than in any recent year. “Health and Human Service's” 32.4% share is its seventh largest in the 38 years of this measurement. At 8.1%, “Corrections” share of total General Fund spending is its fourth largest ever and is anticipated to grow by the largest percentage (17.9%) of any of the categories. “Corrections” continues to be the ex-

penditure category with the highest growth in State General Funds over the past 38 years to be (Appendix A).

Displays 4 and 5 show State personnel years (filled positions) and State employee salary cost estimates for the five major budget expenditure categories, along with individual proportions of personnel years (PYs) and accompanying salary costs since the 1967-68 fiscal year. Higher education accounts for 35.8% of total PYs and 34% of accompanying salary costs. The largest number of State government filled positions and total salaries reside in the smaller budget categories “Legislative-Judicial-Executive,” “Business, Housing, Transportation,” “Resources,” and “State and Consumer Services” combined here as “Other Government Functions.”

Budgeted positions in “Health and Human Services” dropped by one third four years ago due to the reclassification of some functions outside that category. For 2004-05, its share of positions and salaries is within one percentage point of the past year. For the category “Corrections,” the 2004-05 percentage of total positions (16.7%) is its second highest and of total salary costs (18.8%) is the highest in the 38 years covered. The positions and salaries shown for K-12 Education do not include the local districts and, thus, this category has maintained a very small share (less than 1%) of total State personnel over time.

Over the last 37 years (Appendix A), the category “Corrections” has seen the largest increase in the proportion of any category in both its total filled positions (436%) and its salary costs (3,626%) since 1967-68. The State program category next-closest in growth is “Higher Education,” but its positions (111%) and salaries (1,138%) have increased at a rate less than one-third that of “Corrections” over time.

Display 6 presents State General Fund expenditure for State operations and local assistance in the five major budget expenditure categories in actual and “constant” 2004-05 dollars, using the State and Local Government Purchases Index to control for inflation. The first page of Appendix A shows changes over time in these data. It shows that when the effects of inflation are removed by calculating constant dollar amounts, General Fund spending for “Higher Education” has increased just 188% in 37 years. This is only three-fifths the rate of inflation-adjusted growth in spending for the State as a whole (305%) and is lower than any of the other program categories, except for “Other Government Functions.”

Since 1967-68, “K-12 education” inflation-adjusted General Fund spending has grown 327% and “Health and Human Services” 373%. The expenditure category with, by far, the largest inflation-adjusted spending increase over time is “Corrections,” with a General Fund spending increase of 715% since 1967-68. Spending increases of this relative magnitude usually are the result of some short-term activity or other data aberration, however, “Corrections” spending has consistently increased since

1967-68. In the 37 years of this measurement, year-to-year “Corrections” spending has declined in only four and in only one year (2003-04) was its General Fund decline the largest registered for the expenditure categories. If past trends are any evidence, even the scale of this estimated decline in “Corrections” spending may not hold up once final data are available for the 2003-04 fiscal year.

---

*Total State  
spending plan*

Display 7 shows the three different types of revenue sources that comprise State General Fund revenues and a portion of State Special Funds. There have been multi-billion dollar swings in “estimated vs. actual” tax and fee receipts and inter-fund transactions over the last four years and this volatility is reflected in this display. Prior and current budget year policy changes in “Minor” taxes (regulatory fees and proceeds from governmental transactions) have dramatically lowered their totals from earlier levels. In 2002-03, “Minor” taxes generated almost \$13 billion, however for the current, 2004-05 year, estimated revenues from these sources are less than \$2.3 billion. Among the more public of these changes is the lowering of the State’s vehicle license fee rate; this action accounts for \$3 - \$4 billion of the reduction in “Minor” tax receipts. Even at this lower level, revenues generated by “Minor” taxes have risen by 86% over the past ten years.

“Major” tax receipts (mostly income and sales-based taxes) are expected to increase by **\$billion** (6%) in 2004-05 over 2003-04 levels. Including loans and inter-fund transfers, the total of these revenues in the year is projected to be \$76.4 billion, down \$1.2 billion (1.6%) from last year. These total revenues have increased 79% over the last ten years. The lowering of “Minor” tax receipts has proportion of General Fund revenues represented by “Major” taxes to 96%, a proportion much more in line with its historic levels.

Displays 8, 9 and 10 detail the “Total State Spending Plan” since 1965-66. This plan accounts for nearly all State appropriations of State and non-State funds in five funding categories used by the State. While the State General Fund is the largest and most well known component of State government spending, its proportion of the State Spending Plan for the current year is projected to reach its seconds lowest level in the post Proposition 13 era. Only in the recession year of 1993-94 has the State General Fund accounted for less total spending than 2004-05’s 32.3%. Total State government-authorized spending in California for 2004-05 is projected to be \$236 billion, as increase of \$1.2 million (0.5%) over estimates for 2003-04.

Over a three-year period in the late 1990s and early 2000s, Total State spending increased by \$57 billion (39%). Over the most recent three years, Total State spending is estimated to have grown by only \$21 billion (10%). Three of the five funding categories are anticipated to experience one-year declines in revenues. State General Funds, State Special Funds and, Local funds all are projected to have lower revenues in 2004-05 than

in 2003-04. “Nongovernmental Cost” funds (monies derived from sources such as working capital revolving funds, bond funds, and retirement funds) and Federal Funds to the State are both projected to grow in 2004-05 over the prior year’s level.

Display 9 shows that after the General Fund’s 32.3%, the largest funding source for the State in 2004-05 is projected to be the Federal government at more than 23.3%, just ahead of Nongovernmental Cost funds at 23.1%. State “Special” Funds (restricted-purpose revenues from taxes, licenses and fees) are anticipated to generate 9% of total State spending in 2004-05. Local Property Tax revenues are projected to account for only 12.4% of the total State appropriations in 2004-05, its second lowest proportion of total State spending in 40 years. Local Property Tax revenues – which used to account for a greater proportion of total spending than did the State General Fund – reached a post Proposition 13 high of 15.7% in 1990-91. In an historical context, local property tax revenues averaged 34% of total State spending for the thirteen pre-Proposition 13 years shown here but have averaged only 14.3% in the 27 post-Prop 13 years.

The pre and post-Prop 13 proportions for the State General Fund evidence the same trend in reverse, as General Funds were used after Prop 13 to pay for government functions formerly funded through local revenues. This trend is not as pronounced for General Fund spending because of the large size of this fund source. In the thirteen pre-Proposition 13 years, General Funds averaged just over 31% of total State spending, however, for the twenty-seven post-Prop 13 years, General Funds have represented an average almost 39% of total State spending.

Changes in the proportions of Total State Spending Plan represented by these five funding categories is even more evident in Display 10, which shows these funds in both actual and 2004-05 “constant” dollars. The first page of Appendix A shows these calculations over a thirty-nine year period. The range of percent changes in “constant” dollars are: a high of 851% for Nongovernmental Cost Funds, 571% for Federal Funds, 510% for the State General Fund, 460% for the Total State Spending Plan, and 314% for Special Funds. However, Local Property Tax revenues without the effects of inflation have grown only 79% since 1965-66.

Display 11 describes Proposition 98 funding for public K-12 education and the California Community Colleges and Display 12 shows the “State Appropriations Limit” (SAL). The Proposition 98 data shown in this display is more informational than explanatory, given its complex nature and the annual negotiations and policy decisions surrounding it. For the 2004-05 fiscal year, it is estimated that \$47 billion in State and local funds will be allocated to public school and community college education under the Proposition 98 funding guarantee, an increase of \$777 million, (1.7%) above the prior year. The California Community College’s 2004-05 share of Proposition 98 revenues is estimated to maintain the past two years’ share of 10.6%. This 10.6% share is a much higher proportion of

total Prop 98 revenues than the colleges have received since 1991-92. The highest share of Prop 98 revenues the Community Colleges have ever received was 11.8% in 1990-91.

The information in Display 12 shows the State Appropriations Limit (SAL), which is calculated each year as a requirement of the 1979 voter-approved initiative Proposition 9 in 1979. The SAL is calculated based on changes in California Per-Capita Income, State population growth, and K-12 student enrollment, all of which had been accelerating in recent years. It is not uncommon for budget year projections of covered spending to be near the SAL, only to end up much lower once the final tally of spending – and final calculation of the limit – are completed. For 2004-05, the State is initially anticipated to be well below the appropriations limit. The extended recession and slow recovery continues to impact tax revenues, along with population and student enrollment growth. Thus, qualified State expenditures are projected to account for only four-fifths of the State appropriations limit in 2004-05 and leave the State an estimated \$13 billion under the spending limit.

---

*Funding per unit of  
full-time-equivalent  
student enrollment*

Displays 13 through 15 show total funding from various sources per full-time-equivalent student enrollment for the California Community Colleges, the California State University, and the University of California through 2004-05. The three displays are informational in nature for comparisons of changes in per-student funding from selected sources within individual systems and not between them. Each display represents funding levels related to the distinct educational missions of the individual systems and, for that reason, they are not intersegmentally comparable.

As shown in Display 13, combined State General Funds and systemwide student fee revenues per full-time equivalent student are projected to decline by 9.4% from 2003-04 to 2004-05 at the University of California. Since 2000-01, these combined funds per student have declined by 11.9% (\$2,671). The drop has been greater for the “General Funds per student” portion of funding; it is now anticipated to be 27.7% (\$5,159) lower than in 2004-05.

Combined State General Funds plus systemwide student fee revenues per full-time equivalent student at the California State University (Display 14) in 2004-05 have increased since 2003-04. Display 14 shows that the one year change is expected to be an increase of 5.1% (\$500) and the four-year change an increase of 2.2% (\$222). However, as was the case with the University of California, when only State General Funds per student are measured, they show a four-year decline of 10.8% (\$917).

For 2004-05, Display 15 shows that average funding per FTES from combined State, student and local fund sources is projected to increase by 8.8% (\$360) in the California Community Colleges over last year’s amount. However, the four-year change here is estimated as a decline of 0.9% (\$42) for these combined funds. For each of the systems, the trend

in recent years is that the student charges portion of “combined” funds per student increases more than the state funds portion.

Displays 16 through 18 contain information on average appropriations per full-time-equivalent student for instructional-related activities (I-R) in the public systems and expenditures per FTE for instructional-related activities in selected California independent institutions. The public-sector information is an annual update based upon the 1993 Commission report, Expenditures for University Instruction (CPEC 93-2) and the information for the independent sector was provided by the Association of Independent California Colleges and Universities (AICCU). The methodology for determining instruction-related revenues was developed by the Commission and the three public higher education systems, in consultation with the Department of Finance, the Legislative Analyst’s Office, and other State officials in 1993 (see “Notes and Sources”).

This comparison is presented for the State’s three public postsecondary systems through the 2003-04 fiscal year. It also includes expenditures per FTE for instructional-related activities in AICCU institutions through fiscal year 2002-03. The information is shown by major State and institutional fund sources, labeled here “State-determined funds,” and as totals for each system. In addition to actual dollar amounts, 2003-04 “constant” dollars are shown here, calculated using the Higher Education Price Index to mitigate the effects of inflation over time. Excluded here for the public postsecondary systems are all federal and private fund sources.

The information presented for the public sectors for the 2003-04 fiscal year are estimates, based on information available from the Governor’s May Revision of the proposed 2004-05 fiscal year. It is important to note that these data are projections at this point.

For the most recent year, these data show that total average I-R funding per student for the California Community Colleges (CCC) is projected to decrease by 0.5% (\$21) from 2002-03 levels. Similarly, total I-R funding for the California State University is estimated to have declined between 2002-03 and 2003-04. At the State University, the drop in average total I-R funding per student is projected to be just 0.6% (\$67). But at the University of California, the one-year change is actually an increase of 6% (\$908). This increase is due entirely to growth in student fee revenues, both systemwide and as accounted for under “General University Revenues.”

When measured in 2003-04 “constant” dollars, again both the community colleges and State University show year-to-year declines in per student funding for instruction-related activities. Total constant dollar I-R funding per student drops 7.1% in the community colleges and 3.4% for the State University, but increases 2.9% at the University of California. Information on the second page of Appendix A shows longer-term changes for this display. Since 1980-81, the display shows that in constant dol-

lars, total average I-R funding per student has declined at all three public systems – 13% for the community colleges, 15% for the State University, and 8% for the University of California.

Actual-dollar I-R expenditures per student for the AICCU institutions show an increase of 3.2% (\$757) between 2001-02 and 2002-03. In constant dollars, I-R expenditures per student in the independent sector dropped 9.3% (\$2,477) over this time.

---

*Appropriations  
of funds for  
California higher  
education*

Displays 19 through 28 show total funding for the State's three public higher education systems along with the annual percent changes in total funding for each system. These data are presented individually for each system, by revenue source, and in terms of the proportion of total funding represented by each fund source. Display 19 shows that State General and Local funding combined for all three public higher education systems is a combined \$10 billion dollars in 2004-05, a 1.6% increase from last year. This level of funding is still lower than that for any year since 1999-2000.

For each of the three public systems, the share of total general purpose funds represented by systemwide student-fee revenues is anticipated to climb in the current year to near historic highs. Student fees now account for 5.9% of total general purpose funds at the community colleges, 16.6% at the State University, and 6.7% at the University of California. While the 2004-05 proportions of total funds represented by student revenues seem small, the State University's and University of California's percentages are the highest in the 38 years of data present. The community college's 5.9% of general purpose funds represented by student fee revenues is the third highest in its 21-year fee revenue data series.

For the University of California, the information in Display 21 shows that for the current year the University will have total operating revenues of \$18.7 billion, with more than three-quarters of these funds designated special or restricted use and not available for general operating purposes. At \$2.7 billion, State General Funds at the University of California are projected to be lower in 2004-05 than at any time since 1998-99. For 2004-05, University of California systemwide student fee revenues are expected to generate almost \$1.3 billion in operating funds, twice what it generated in 1998-99. Display 23 shows the University's fund sources for organized research, excluding the U.S. Department of Energy laboratories. While the federal government provides more than half of this funding in 2003-04, as it has historically, nearly one-sixth of it comes from State general and special State appropriations and contracts with State agencies. A quarter of this funding is generated by University gifts, contracts and grants, and endowment funds.

In Displays 24 and 25 for the California State University, 2004-05 State General Fund revenues are anticipated to decline by 1.8% (\$44 million) from last year's level. Systemwide student fee revenues are projected to

increase 12.4% (\$100 million) in the current year. Two years ago, State General Funds represented more than five times as much funding for the State University as did systemwide student fee revenues but today the ratio is 2.7:1. State General Funds now comprise 45% of the State University's operating funds, nearly two percentage points less than last year. State University "Other Funds" (mostly auxiliary and self-supporting operations) is the system's second largest operating fund source at 31%.

Overall operations funding for the California Community Colleges (Displays 26 and 27) is projected to increase by 12% in 2004-05, which is more than \$600 million. State General Funds are projected to grow by 36% this year, more than offsetting a 17% decrease in Local Property Tax revenues. Systemwide student fee revenues are expected to jump by 35% (\$87 million). At nearly \$1.8 billion, revenues from property taxes for the community colleges are lower now than at any time since 2000-01.

---

*Categories  
of expenditures  
for the systems*

Displays 29 through 33 show expenditures of general-purpose funds for ongoing operations in each of the three public systems by the various expenditure categories used by each system. General-purpose funds consist almost exclusively of the State General Fund, local revenues, and systemwide student-fee revenues, along with system-specific funds used for regular ongoing operations. In addition, these displays include calculations of the proportion of total expenditures represented by each category of expenditure for each system. When viewing these data, please note that some of these expenditure categories (such as public service and student service) are also funded using restricted-purpose and other revenue sources that are not accounted for in these displays.

Displays 29 and 30 show that in 2004-05, nearly \$1.8 billion in general-purpose funds will be allocated among expenditure categories in the University of California. Spending on "Instruction and Research" represents 54% of these funds, a 4% increase from last year and this category's highest share since 1993-94. 2004-05 general-purpose fund spending also increases to 12.3%, its highest level since 1997-98. Funding for the category "Public Service" is anticipated to drop to 2.5%, its lowest share since 1995-96, however, this activity is also funded by other sources in addition to general-purpose funds. As has been the case for 12 of the past 13 years, no general-purpose funding is allocated to "Student Services" in the University in 2004-05. Primary funding responsibility for this category was switched to student fee revenues at the beginning of the State's early 1990s economic recession.

Information in Display 32 shows that the California State University will spend 45% of its general-purpose funds on "Instruction," a decline from last year but in line with its proportions this decade. 2004-05 spending on "Student Services" is expected to increase to 15.5%, while general-purpose funding for "Academic Support" will drop to 12.2%. The State University expenditure category "Institutional Support" accounts for nearly 26% of general-purpose funding. This category includes spending

on the system’s many administrative functions and the operation and maintenance of the physical plant.

For 2004-05, the California Community College system is estimated to spend more than 89% of its general-purpose funds on enrollment-driven apportionments to the colleges (Display 33). This is in line with its average over the past three years, however this share is much lower than it was from the late 1960s through the mid-1980s. The category “Special Service and Operations” is projected to represent just under 11% of community colleges operations funding in the current year.

---

*Student tuition  
and fee charges  
and revenues*

Displays 34 through 39 contain a variety of information on resident student fees and non-resident student tuition at the State’s three public systems, and the revenues generated by these charges. For 2004-05, the budget assumes increases in systemwide resident undergraduate student fees of 14% at the California State University and the University of California and increasing community college per unit fees from the current \$18 to \$26.

With these projected increases, the three systems’ combined total revenues anticipated to be derived from systemwide student charges (not including mandatory campus-based fees) in 2004-05 is more than \$2.6 billion. In 1990-91, the last fiscal year before the State’s economic recession of the early 1990s, systemwide student charges generated a total of \$472 million; in 2000-01, the last fiscal year before the State’s economic recession of the early 2000s, these charges generated \$1.3 billion. Including revenues from tuition charged to non-residents, student charges may generate more than \$2.9 billion in 2004-05. As perspective on the magnitude of the student-generated revenues, University of California tuition and fees are now expected to generate more than half as much money in 2004-05 as is allocated through State General funds.

The table at the top of the third page of Appendix A shows changes in student fee revenues since 1965-66 (1984-85 for the community colleges) adjusted to remove the effects of inflation. The information shows that for 2004-05 non-inflation revenues (not fee levels) generated from total student tuition and fee revenues are projected to have risen 1,233% at the State University, 1,416% at the University of California, and 151% at the community colleges since 1965-66. These “non-inflation dollar” rates of growth far eclipse those of any other operating revenue source at the State University and the University of California and rival the percentage increases of any fund sources in the community colleges.

Displays 36 – 39 show undergraduate resident student fees and nonresident tuition from 1965-66 through the current year. The displays show both systemwide fees and “total” fees, which includes averages of mandatory campus-based fees at the State University and University of California. As noted earlier, increases in resident student fees are assumed for 2004-05. Fiscal year 2004-05 “constant-dollar” amounts of student fee

levels (not fee revenues) are shown in Displays 39 and summarized in Appendix A. These data show that when the effects of inflation are removed, resident undergraduate “total” student fee levels have risen 262% at the State University and 232% at the University over the past 39 years. Over the 20 years of systemwide student fees in the community colleges, these fee levels have grown by 253% in constant dollars. As a measure of how rapidly student charges rose in the period between 10 and 20 years ago, the constant-dollar rates of change in fee levels over the past ten years are in the single digits for the State University and University of California but are each in excess of 100% when compared with 20 years ago.

---

*State financial aid*

Displays 40 through 43 show funding for the State’s Cal Grant A, B, C, and T student financial aid programs for public, independent and proprietary postsecondary students administered through the California Student Aid Commission (CSAC). This report continues the new Display 41a, which provides separate information on new competitive and entitlement Cal Grant A and B awards along with totals that include renewal awards, for fiscal years 2001-02 through 2003-04. This display better reflects the changes to the Cal Grant system adopted in SB 1644 (Chapter 403, Statutes of 2000). Display 40 shows yearly summaries, by program, of new and total (including renewals) Cal Grant awards, and viewed as a whole. State General Funds account for more than \$710 million of the \$720 million anticipated to be spent on Cal Grants in the current year.

While the Cal Grant program comprises a relatively small portion of overall student financial aid in California, its impact is significant. In total, for 2004-05 there are more than 200,000 active Cal Grant awards going to California students. Display 41 shows that for the past year (2003-04) there were 62,763 new Cal Grant Entitlement Program awards and 21,505 new Cal Grant Competitive Program awards in the “A” and “B” awards programs. Combined information for the Cal Grant “C” and “T” programs shows that there were a total of 10,991 active awards in these programs. However, the bulk of these are “C” awards, as the Cal Grant “T” program has been phased out and converted to a loan assumption program for teachers.

As Display 42 shows, there were no changes made in the maximum level of Cal Grant awards for 2003-04, however a lowering of the Cal Grant “A” maximum award is being debated for the current 2004-05 State Budget. Display 43 shows numbers of outstanding student loans and total student loan dollars guaranteed by CSAC, in three groupings of educational sectors. Both the numbers of student loans and the total dollar amounts of those loans increased between 2001-02 and 2002-03 for all three sectors. The total numbers of loans to students attending the State’s public systems rose 7.3% for 2002-03 and 12% for the State’s independent institutions and proprietary schools. In total for 2002-03, CSAC guaranteed 912,545 student loans worth more than \$4 billion, increases of 22.1% in loans and 25.7% in loan dollar volume over 2001-02.

---

*Capital outlay  
funds*

Displays 44 through 49 show capital outlay (construction and building renovation projects) funding for California's three public higher education systems, including both State and non-State fund sources. Due to the volatility and project specificity of the funding source "Other, Non-State," it is excluded here from the calculations of annual percent changes in total capital outlay expenditures. The 2004-05 budget contains more than \$1.9 billion in State capital outlay funding for the three public systems, \$1.3 million of this from the voter-approved Higher Education Capital Outlay Bond Act of 2004. Most of the other funding comes from remaining balances of 1996, 1998 and 2002 General Obligation Bond initiatives approved by the voters.

More than \$340 million in construction funds are provided through the Public Buildings Construction Fund, which acts as a bond issuance authority for the State. Excluding "Other, Non State" sources over the past dozen years, voter-approved general obligation bonds and lease-revenue bonds have provided virtually all of the funding for California's public higher education systems' building programs. In recent years, the State General Fund had also been tapped to pay for construction on the campuses, however no State General Fund money is included in the systems' capital outlay budgets for 2004-05.

---

*Independent  
institutions in  
California and the  
nation*

Displays 50 through 60 show information for California's independent colleges and universities belonging to the Association of Independent California Colleges and Universities (AICCU). Displays 50 and 51 show information on student financial aid for all independent institutions through 2003-04. Display 50 shows that a total of 26,551 students attending independent institutions received Cal Grant awards in 2003-04. Display 51 shows that in 2003-04, the percentage of tuition at independent institutions covered by the maximum "Cal Grant A" award dropped to 42.5%, continuing its steady decline from the recent-year high of 53.8% in 1999-2000. The data also show that the proportion of Cal Grant A winners attending independent institutions grew to 30% in 2003-04, its second highest percentage since over the past 12 years.

Displays 52 through 57 deal with current fund revenues, enrollments and educational and general (E&G) expenditures in AICCU institutions through fiscal year 2002-03. In Display 52, total current fund revenues for independent institutions have substantially recovered from the past two years' decline. Total current fund revenues in 2002-03 were \$11.6 billion, up from 2001-02's \$8.8 billion. When coupled with a 4.1% (7,652 FTE) increase in enrollments, total current fund revenues per FTE student rose \$60,119 in 2002-03. Display 53 shows that each FTE student generated an average of 33.7% of these in revenues in 2002-03, or \$20,257 per student.

Display 54 shows information on headcount and FTE enrollment and weighted average tuition levels for independent institutions. As of 2002-03, there were more than 230,796 students enrolled at AICCU institu-

tions, a 4.4% increase over the prior year. The weighted average tuition at AICCU institutions for 2002-03 was \$21,465, a 6.7% increase over 2001-02. While the average tuition level per student was \$21,465, actual tuition revenue per FTE student was \$20,259. Actual student-generated revenues covered 84% of instruction-related expenditures per FTE student in 2002-03 (see display 18 for further information). Displays 55 through 57 show education and general (E&G) expenditures, average expenditures per FTE student, and instruction-related expenditures. Total E&G expenditures at the AICCU institutions grew to \$6.5 billion in fiscal year 2002-03, a one-year increase of \$445 million or 7.3%. For fiscal year 2002-03, average E&G expenditures per funded student were \$33,973, an increase of \$1,002 or 3% over the prior year.

Displays 58 through 60 show state funding and enrollment information for independent institutions for selected states. This information is gathered through the State-National Information Network (SNIN) of the National Association of Independent College & University State Executives (NAICUSE). Display 58 shows that, for the 20 states for which data were available for 2002-03, California overtook New York and now allocates more State funds to independent colleges and universities than do any of the states reporting even though several states enroll more students in independent colleges and universities than does California.

Display 60 has been reformatted for this year and shows undergraduate, graduate, and professional headcount enrollment in the nation's independent colleges and universities through 2002-03 (Fall 2002). California continues to have one of the nation's largest populations of students attending independent colleges and universities. There were 230,796 students attending California independent institutions in fall 2001. According to fall 2001 SNIN data, New York enrolls the nation's largest number of students in the independent sector (439,561), followed by Pennsylvania (254,861), and Massachusetts (214,770). Including California, these are the only four states in the nation that presently enroll more than 200,000 students in their respective independent sectors, though Illinois (197,555 students) is fast approaching this threshold as of 2002-03.

Appendix A shows changes in FTE enrollment nationally over the last eight years (Fall 1994 to Fall 2002) for California and other selected states with large independent sector enrollments. Minnesota (7%), Massachusetts (5%), and California (5%) have the largest year-to-year increases in funded student enrollment for the most recent year. Over the last three years, New Jersey (17%), Tennessee (13%) and Ohio (12%) have experienced the greatest enrollment growth in independent sector enrollment. California's independent postsecondary sector has seen funded student enrollment grow by 28% in the eight years since 1994. Other states' with large increases in independent sector enrollment over that time include: Ohio and North Carolina, each at 19%, and Massachusetts and Tennessee, each at (17%). Only Pennsylvania (-9%) of the states with more than 200,000 independent sector students has seen a de-

cline in enrollments over this time. The other 200,000-plus independent student enrollment state, New York, has seen 12% growth since 1994. Two states with very large independent sectors in recent years – Illinois and Florida, both with headcount enrollments over 100,000 student in Fall 2002 – are excluded from this measurement due to a lack of past year data.

---

*Enrollments in  
California public  
postsecondary  
education*

Displays 61 through 64 show headcount and FTE (funded) enrollment for the California Community Colleges, the California State University, and the University of California. Funded enrollment information in Displays 61 and 62 projects an increase of 26,855 FTE students in the community colleges and 10,794 FTES for the State University over the prior year. A one-year 920 decline in FTES is anticipated for the University for 2004-05. The data estimate that for the three systems as a whole, nearly 20,000 additional headcount students will enroll in the 2004-05 academic year above the level enrolled in 2003-04.

Displays 63 and 64 show breakdowns of FTES enrollment, first in the University of California, then in the California State University and the California Community Colleges. The information in Display 63 shows only a fractional decrease of 18 FTES in the University's non-health sciences enrollment for 2004-05, but a 7% (902 FTES) reduction in health sciences enrollment. In Display 64, the State University FTE enrollment information is shown by level of students, while the Community Colleges' FTE enrollment information is presented by funding source. While Community College funded enrollment is expected to increase 2.4%, State University enrollment is anticipated to decline 3.2%.

All of this information shows that whether measured in terms of actual (headcount) or funded units (FTE), student enrollment in California public postsecondary education has risen significantly since the mid-1990s, though the 2000s recession has restrained this rate of growth. Over the past ten years, Community College FTE enrollment has increased 34%, State University FTES enrollment has grown 31%, and University of California FTES enrollment has grown 32%. The information shown on the top of the fourth page of Appendix A shows that the community college system is twice its size in the mid 1960s in terms of funded student enrollment. The State University and University of California are each one and three-quarters as large now as they were 40 years ago.

---

*Price (inflation)  
indices, income  
growth, and system  
financial support*

Displays 65 through 67 show actual index values, annual percent changes, and inflation factors (used for "constant-dollar" conversions) for selected State and national price indices, including the Higher Education Price Index (HEPI), California Personal Income, and Implicit Price Deflators, through 2004-05. Due to a lack of available data, 2004-05 information for the Research and Development and Boeckh Construction Price indices in Display 67 are projections. For 2004-05, nearly all of these measurements of public inflation show that the rate of price increases will

pick up from the slower pace of recent years, ranging 2% – 3 % growth. As shown in Appendix A, most of the inflation indices have grown 25% – 30% over the past ten years, the exception being California personal income, which has increased 64% over the past decade. After a three years of relatively slow growth, as is shown in Display 66, the annual rate of growth in California personal income is expected to pick up in the current year, with a projected rate of 5.4% in 2004-05.

---

*Actual and  
constant-dollar  
state-determined  
funds*

Display 68 compares the annual percent changes in some of the indices with annual changes in State General and Local Funds in the three public higher education systems. Also included are annual budgeted faculty salary adjustments and the Commission's yearly faculty salary parity adjustment calculations for the California State University and the University of California. For 2004-05, the Commission estimates that the State University would need a 12.7% increase and the University of California a 10.6% increase to gain parity with their respective groups of comparison institutions. Salary differences initially projected for the current year are usually adjusted downwards once information on actual salary changes at comparison institutions and at the State University and University of California are factored into the salary parity calculations in the following year. Still, the faculty salary parity gap for each system has increased in recent years and with the limited funding available for 2004-05, the projected current gap may be close to the final number.

Display 69 shows comparisons of fund sources labeled here "State-determined funds" for the State's three public higher education systems. These are fund sources (primarily State and local funds and student charges) over which the State and/or the education systems exercise policy-making or allocation authority. For the State University and University of California, State General Funds represent the majority of State-determined funds but not as large a proportion as in past years. At the beginning of this decade (2000-01), General funds represented 75.5% and 78.5% of total State-determined funds for the State University and University of California respectively. This year, those percentages are down to 68% for the State University and 59.8% for the University of California. The proportion of State-determined funds represented by system-wide student fee revenues is projected to be 25.1% for the State University and 27.7% for the University of California in 2004-05. Both of these are substantial increases in share from 2000-01 and are historic highs for the 40 years of this display.

State General plus Local revenues account for 91.3% of the California Community Colleges' State-determined funds. While still the overwhelming source of the system's funding, this share of the total is the fourth lowest in the 40 years of data shown here. The community colleges do not have an equivalent fund source to the State University and University of California's institutionally generated general funds. Systemwide student fees in the community colleges are expected to generate

6% of the system's State-determined funds in 2004-05, which is its third highest proportion in 40 years.

For all of the systems, revenues from the State lottery represent very small proportions – 0.5% - 2.6% – of the systems' total State-determined funds for their operations. The lottery has never represented more than 1.1% (1988-89) of this total for the University of California and its high for the State University was 2.8% back in 1989-90. For the community colleges, 1988-89's 5.4% represents the high for lottery revenues as a proportion of total State-determined funds. Since the beginning of this decade (1999-2000), the lottery has represented an average of only 2.8% of these revenues at the community colleges, just under 1% at the State University, and less than 0.6% at the University of California.

These data show just the opposite picture for Systemwide Student Fee revenues at each of the systems. In 1999-2000, revenues generated from student charges were 3.7% of revenue for community colleges, 16.2% at the State University, and 16.8% at the University of California; in 2004-05, they are estimated at 6% at the community colleges, 25.1% at the State University, and 27.7% at the University of California.

Displays 70 through 75 show appropriations of State-determined fund (SDF) sources for current operations in current (actual) dollars and 2004-05 "constant" dollars, as total appropriations per Full-Time Equivalent (FTE) student. These data are those used for the percentages shown in Display 69. For the University of California, total 2004-05 current-dollar State-determined funds per student have risen only 0.8% over 2003-04 levels to an average \$22,554. In 2004-05 constant dollars, total SDF per student in the University have risen only 2% in 37 years. For the State University, the one-year, current-dollar change in these funds per student is 5.4% and the 37-year, 2004-05 constant dollar increase is only 0.7%. For the community colleges, these changes show substantial variance – a 9.7% year-to-year increase in current dollars but a fraction of a percent constant dollar decrease for the 37-year period.

---

*Hastings College of  
the Law and public  
school support*

Display 76 shows the State General Fund and total funds (including student fee revenues) for Hastings College of the Law and the school's FTE student enrollment. Hastings College's State General Funds are anticipated to decrease by nearly \$3 million from prior year levels in 2004-05 and its total operating funds are expected to drop by \$2.7 million. Over the last ten years, Hastings College total funds have increased by 71%, with most of this increase due to growth in Hasting Funds – which consist mainly of student fee revenues. Over the past ten years, while Hastings College's total funds have increased 71%, its State General funds have actually decreased by 31%. Over this same ten-year period, the Hastings Funds have increased 261%.

---

*Per-capita spending  
in California public  
education*

Displays 77 through 79 show funding and funded enrollment information for California public elementary and secondary education (K-12). Total

funding for public K-12 education, including federal and other funds, is estimated to be \$59 billion in 2004-05, an increase of \$2.2 billion (3.8%) over the adjusted totals for last year. Combined State and local funding for public K-12 education is more than \$51 billion this year, \$1.7 billion (3.4%) higher than the revised 2003-04 totals.

Enrollment in the public school system is measured in units of “average daily attendance” (ADA), and the system’s funding is primarily based upon levels of ADA. These data are awaiting updates for the 2003-04 and 2004-05 fiscal year.

Displays 80 through 83 show “per-capita” appropriations of revenue sources for current operations for the public K-12 education and higher education systems. Per-capita calculations divide a given data series by a defined population grouping; in this measurement, funding levels are divided by the population of the State of California. These displays for K-12 education and the three public postsecondary education systems show changes in per-capita funding over the years and contrasts per-capita funding in each education system from only State funds (including Lottery revenues) with changes in combined per-capita funding that includes local funds for K-12 and student fee revenues for the postsecondary systems. The State University and University of California systems are projected to show year-to-year declines in per-capita State funding for 2004-05, while the community colleges show substantial increases when viewed in either State or combined funds.

Display 84 shows average per-capita “combined” fund spending for the State’s four public education systems from the four prior displays individually and as a “K – University” total for each of the past 40 years. Using these data, Display 84 calculates 2004-05 average per-capita appropriations for the California’s four public education systems in combination. Of the projected total for 2004-05, K-12 Education share is preliminarily estimated at 77.7%. For higher education, the community colleges are 9.3%, the State University is 5.7%, and the University of California is 7.4%. These shares of combined per-capita have changed only fractionally over the past dozen years and very little over the four decades of this measurement. The community college’s share of this total has gyrated the most over the years, going from a low of 5.7% in 1966-67 to a high of 11.9% in 1977-78 to an average of 8.7% for the past dozen years.

Display 85 shows per-capita appropriations of State General Funds in five “combined” State expenditure categories (as shown in Display 6) for years 1967-68 through the present. These data are also shown proportionally, as their respective “shares,” of the total of per-capita State General Fund expenditures. Here, K-12 Education has the largest dollar amount (\$930) and the largest share (43.7%). The second highest, is Health and Human Services (\$691; 32.5%), then Higher Education (\$254; 11.9%), Corrections (\$170; 8%), and General Government (\$82; 3.8%).

Year-to-year per-capita appropriations for 2004-05 are projected to increase in all five expenditure categories, except General Government. In total, the State is expected to spend \$2,127 dollars per resident in 2004-05 on these five areas of government. This represents a decline of \$34 (1.5%) from 2003-04 total for per-capita appropriations in the five expenditure categories.

Display 86 calculates actual California “Per-capita” personal income since 1965-66 using information and methodology from the United States Bureau of Labor Statistics. The information in this display differs from the “California Personal Income” shown in Display 66 in that per-capita personal income shown here is the average income for each person living in the State (please see “Definitions”), while the earlier display measures overall changes in income not divided by population. Using revised November 2003 U.S. Bureau of Labor Statistics information provided by the California Department of Finance, it is estimated that California per-capita personal income will increase by 3.9% for 2004-05. As is shown on page 5 of Appendix A, during these past 39 years, constant-dollar per-capita personal income in California has increased 51%, using the State CPI, while the State’s population has grown 95%.

---

*Education funding  
and enrollments in  
comparison to state  
funding and population  
growth*

Display 87 shows changes in the averages of State and combined fund appropriations, per person, for Californians served in the two education areas in terms of State finances and total finances. The population information used in these calculations is shown in Display 88. First, the combination of the State General Fund, Local Tax Revenues, and Non-governmental Cost Funds (see Display 8) are divided by the State’s population, similar to the calculation for the State’s “per-capita” spending. Then, for public higher education, the systems’ combined State, local, and student fee revenues are divided by headcount enrollment to provide caseload average appropriations. Finally, K-12 combined (State and local) funding is divided by K-12 headcount enrollment.

In terms of annual change for 2004-05, overall State funding per California resident is projected to increase less than 0.1%, while K-12 State and Local combined caseload funding increases 1.5%, and Higher Education funding per student decreases by nearly 1.4%. As is shown on the last page in Appendix A, these measurements continue to show that relative to increases in its service population, State funding for higher education has experienced by far the lowest overall growth in public-fund “dollars per caseload” of the three categories. Higher Education’s 39-year growth rate in per-student funding of 534% is just over half the 954% growth rate for per student combined State and Local funds for K-12 education and the 1,276% rate of growth in overall State funding per resident.

When the effects of inflation are removed from this measurement using the California Consumer Price Index, the distinctions become even clearer, as shown by the information for Display 87 on the last page in Appendix A. In constant 2004-05 dollars, average overall State spending

per resident has increased 9% over the most recent five years and 121% over the 39 years of this measurement. Combined, constant-dollar State and Local funding for K-12 education, per headcount student, has declined by 7% over the most recent five years and risen only 69% over the last 39 years. For higher education, constant-dollar per-headcount student funding over the most recent five years had declined by 2% and over the 39 years since 1965-66 has increased by only 2%.

Displays 88 and 89 show California's population and headcount enrollment in the State's public K-12 education system and in its three public higher education systems. Headcount enrollments in the California Community Colleges has increased the most of those shown here since 1965-66 (264%), followed by the California State University (180%), the University of California (153%), and K-12 headcount enrollment (56%). Over the most recent five years, the rates of growth for California's four systems of public education are in a fairly close range. The five-year rate of enrollment growth for community colleges is lowest at 8%, while K-12 Education (13%), University of California (15%) and State University (19%) are higher. In total, combined public higher education enrollments have grown 12% since 1999-2000 and 233% since 1965-66, a much higher rate than K-12 enrollment (56%), the State's overall population (95%).

Display 90 shows comparisons of overall State General Fund appropriations (SGFs) and State populations with changes in public higher education systems' State and Local funds and combined headcount enrollments. For the most recent year, overall State General Funds are projected to drop by 2.5% and higher education State plus Local funds are anticipated to increase 3.2%. Information for Display 90 in Appendix A shows that for the most recent 5 years, actual-dollar overall State General Fund appropriations (from Display 8) have increased 32%, while higher education State plus Local funding has increased 16%. However, as the length of time covered in this measurement increases, the gap between the two funding areas widens. Since 1984-85, total State General Fund appropriations have increased 233%, while higher education General plus Local funds have grown only 145%. From 1965-66 to the present, overall General Fund appropriations have increased 2,421%, while higher education General plus Local funds have increased 1,788%. In constant 2004-05 dollars, the differences follow a similar pattern, with the 39-year change being 382% for overall General Fund appropriations and 218% for higher education General plus Local funds.

---

*National comparative  
higher education  
appropriations and  
expenditures*

Displays 91 through 98 present information comparing spending on higher education among the 50 states and the District of Columbia. Displays 91 through 94 use information compiled by the Bureau of the Census in its publication "Government Finances," and its succeeding data published only over the internet. The federal government defines some sources and uses of funds differently than does California and excludes some fund sources for higher education in its calculations that are gener-

ally included for California in state-level analyses. As a result some calculations shown here, such as per-capita expenditures in Displays 91 through 94, are not comparable with those in earlier displays in this report. They are included here because these data from the federal government are the best source of information available higher education spending that controls for state variances to produce consistent comparisons across the fifty states. It is important to note that these federal data include expenditures of federal funds for higher education, in addition to state and local fund sources.

Displays 91 and 92 show changes in per-capita state and local government higher education spending over a 36-year period, ending in fiscal year 2001-02; no state-by-state data are available for 2000-01. The average percent change in these expenditures from 1999-2000 to 2001-02 across the seven most populous states is 20%, while the average for the 50-states as a whole is only 7.3%. At 13.1% California's change is the second smallest of the seven states, with only Pennsylvania's 13% any lower. As shown on the fifth page of Appendix A, only Florida's 772% growth since 1966-67 is lower than California's 830% change over this time.

Display 93 expands this comparison to cover the 30 most populous states for the 16-year period 1987-2002. California was in the top ten of the states measured here for the earliest four of the ten years shown, then slipped to as low as nineteenth during the last year of the prior economic recession of 1994. Since 1995, California's ranking has hovered between sixteenth and eighteenth but for 2002, California's \$602 in per-capita expenditures higher education ranks eleventh among the 30 most populous states. California's cumulative sixteen years ranking is thirteenth among these 30 states, as it was last year, at \$386 per person. California still ranks second highest to Michigan among the ten most populous states in both the latest year's data and for the cumulative 14-year ranking.

Michigan (\$734), the nation's eighth most populous state, is third only to Iowa (\$796) and Oregon (\$742) in per-capita expenditures for higher education in 2000 among the 30 largest states. This continues to be the striking contrast to the general rule for this measurement that states with largest per-capita expenditures for education – and most other government program areas – tend to have relatively smaller populations. Michigan is the only one of the ten states with the largest population that also ranks in the top ten in these per-capita expenditures for higher education and this has been the case during each of the 16 years of this analysis. Iowa, the nation's thirtieth most populous state, has the highest level of per capital spending on higher education both for the most recent year and in the cumulative sixteen year ranking. Iowa has ranked first in this measurement for each of the 16 years shown in this display. For 2002, Wisconsin (\$692) ranks fourth behind Iowa, Oregon and Washington (\$676) is fifth. For the cumulative 16-year rankings, Wisconsin (\$470) is

third behind Iowa (\$530) and Michigan (\$485); Colorado (\$456) is fourth and Oregon (\$455) is fifth in this measurement.

Displays 94 and 95 show appropriations of State funds for higher education (as defined by The Grapevine, the higher education finance database operated by the Center for Higher Education Studies at Illinois State University). These displays show information for the nation's 35 most populous states for the last 22 years with annual (and other intervals) percent changes in these appropriations. For 2004-05, California continues, by far, to have the nation's largest overall higher education appropriations, as it has for the entirety of this data series. Even though California (\$9.1 billion) higher education spending is now just barely higher than it was in 2000-01, it is nearly double that of the next highest states of Texas (\$4.9 billion) and New York (\$4.1 billion).

Higher education appropriations declined between 2003-04 and 2004-05 in only seven of the 35 states shown here; between 2002-03 and 2003-04, the number of states declining was 17. The one-year change for the 50 States as a whole was \$2.3 billion (3.8%) on a base of \$63 billion. The 22-year percent increases for the five largest states are 186% for California, 140% for New York, 101% for Texas, 240% for Florida, and 163% for Illinois. The state of Georgia (256%) has achieved the largest percentage increase in funds between 1982-83 and 2004-05, followed by Florida, North Carolina (231%), Utah (226%), Arizona (219%), and New Jersey (218%). California's 186% 22-year increase in higher education appropriations, as defined here, ranks thirteenth.

Display 96 presents higher education current fund appropriations and annual percent changes for the past 25 years in those states that have appropriated more than \$1 billion to higher education operations – a group called the “Megastates” by Peirce (1972). For the purposes of this display, megastates are defined here as those states have appropriated at least \$1 billion to higher education in each of the most recent five fiscal years. This entire data series has been updated for prior years and shows different trends for some states than was evident in past publications.

Due to its sheer size, California's appropriations far eclipse those of the next closest state. Thus, this display also includes state funds for the California State University and the University of California (CSU/UC) as the equivalent of a state. Funding for these two systems together (\$5.2 billion), without the addition of the California Community Colleges and other higher education institutions and agencies, would constitute the second largest “State” in terms of state-funded higher education appropriations for every single year shown here.

The funding difference between the CSU/UC combination and the state with the next largest level higher education appropriations (Texas and New York have alternated here) is \$325 million for 2004-05. This difference has ranged from a high of more than \$1.2 billion, to a low of only

\$57 million. For 13 of the first 16 years of this data series, the State of New York ranked third in this measurement, ahead of Texas. In fact, for fiscal year 1983-84 both states ranked ahead of the CSU/UC combination in this survey. Beginning in 1997-98, Texas' higher education appropriations eclipsed New York's and for the most recent two years has substantially closed the gap with CSU/UC.

Display 96 also presents the 18 states by their annual percentage change in appropriations of State funds for higher education. In the most recent year-to-year comparison (2003-04 to 2004-05), higher education funding in California is anticipated to decline by 1.7% and the combination CSU/UC's appropriations are also anticipated to drop (3.8%). The megastate with the largest anticipated one-year rate of growth in higher education funding for 2002-03 is Georgia (11.3%) and the state with the largest percentage decline is Virginia (12.5%). Overall, ten of the 18 megastates and CSU/UC anticipate year-to-year decreases in higher education spending for the current year, as does the nation as a whole. Eight states expect higher education spending increases in 2004-05.

For the revised 25 years of data presented here, Georgia (393%) still tops the list of megastates in terms of cumulative percent change in higher education funding over time as it did in prior such measurements. The State of Washington ranks second (344%), followed by North Carolina (322%), Texas (267%), Alabama (237%), and Indiana (233%). California (231%) ranks seventh and the CSU/UC combination twelfth in this ranking. Not including the CSU/UC combination, the 17 true megastates higher education appropriations of \$45 billion represents more than 71% of the \$63 billion in general state funds anticipated to be spent on higher education in the nation as a whole in 2004-05.

Display 97 compares State General Fund appropriations for current operations of the California State University and the University of California over the past 15 years with those of their respective national public faculty salary comparison institutions.

State General Funds for the University of California dropped approximately 9% between 2002-03 and 2003-04, a slightly larger rate of decline than the average of its public comparison institutions. Only state funding for the University of Virginia was reduced by a greater amount (12.6%). Combined state funding for the University of California and its four public comparison institutions declined 6.7% for 2003-04, with the University's \$2.7 billion representing the majority of the \$3.5 billion total shown here. Since 2001-02, funding information for the State University of New York system has not been provided for its individual institutions, thus, no specific funding totals are reported for the UC comparator SUNY Buffalo.

The California State University's 7% drop in State General Funds for 2003-04 was close to the average 8.6% decrease in funds for its 15 public

comparison institutions. Though only estimates of funding were available for the University of Wisconsin, Milwaukee – and no campus specific data is available for SUNY, Albany – the overall trend in one-year funding among these institutions was generally one of decline. State spending at the University of Colorado, Denver dropped by the greatest (9.2%), while State spending at the University of Nevada, Reno rose the most (4.8%).

Finally, Display 98 shows a summary of State General Fund appropriations for ongoing higher education operations in the 50 states over the past 40 years, along with annual and two-year percent changes. Changes in the United States Consumer Price Index (U.S. CPI) and the Higher Education Price Index (HEPI) are also shown here for comparisons. These data show the one-year change in total national higher education spending is a \$2.3 billion increase (3.8%), the largest year-to-year dollar gain since 2000-01. Over the longer term, increases in this spending have far outpaced growth in the U.S. CPI and the HEPI. State General Fund appropriations for higher education nationally have grown faster than the U.S. CPI and the HEPI for each of the interims measured on Display 98 and have grown three-to-four times faster than these two inflation indices over the 37 years of change shown.

Notes:

1. Amounts are in MILLIONS of dollars; see the footnotes for this display for **IMPORTANT** information; see APPENDIX A for additional analysis.
2. Constant 2004-05 dollars are calculated using the "State and Local Purchases" deflator; see notes to Display 65 for more information.
3. The category "Other Govt. Functions" is comprised of the five smaller budget categories; please see *"Notes and Sources"* for further explanation.

*Sources: Governor's Budgets, 1969-70 through 2004-05; U.S. Bureau of Labor Statistics; California Department of Finance.*

DISPLAY 7 "Major," "Minor," and "Loan and Transfers" Revenue Sources for the State General Fund, with Annual Percent Changes and Proportions of Total Funds, for Fiscal Years 1965-66 Through 2004-05

Notes:

1. PLEASE see the footnotes for this display in the report appendix for **IMPORTANT** information.
2. State General Funds used to calculate I-R revenues per FTES in 1998-99 include \$70 million in one time funds to support core needs.
3. Systems' "Constant-dollar" funds per FTES are calculated using the Higher Education Price Index (HEPI).
3. Systemwide Student Fees include Education, Registration, and Selected Professional student fee revenues.
4. **ALL information shown for fiscal year 2003-04 are ESTIMATES**, based on the most accurate data available at this time.

2002-03	4,641,078	4,641,078	24,149	24,149	192,188
1-yr % change	7.5%	-5.5%	3.2%	-9.3%	

Notes:

1. PLEASE see the footnotes for this display in the report appendix for **IMPORTANT** information.
2. "Total Instruction-Related Expenditures" amounts are in THOUSANDS of dollars; "I-R Expenditures per FTE Student" are expressed in actual dollars.
3. Data for FY 2002-2003 are taken from all 77 Association of Independent California Colleges and Universities (AICCU) member institutions.

In previous years, data have only been reported for 70 member institutions.

Notes:

1. PLEASE see the footnotes for this display in the appendix to this report for **IMPORTANT** information.
2. Except for the Cal Grant A Maximum Award and Independent Colleges/Universities Cal Grant A Recipients as a percentage of Total Cal Grant A Recipient, data on this table are for AICCU member institutions only.
3. Weighted Average Tuition represents the average amount paid by all students in the sector, not the average amount charged by institutions.
4. Weighted Average Tuition is derived by multiplying FTE student enrollment for each institution by annual tuition and fees for the institution; adding these figures for all institutions, and dividing the total by the number of FTE students of AICCU institutions.

Notes:

1. PLEASE see the footnotes for this display in the report appendix for **IMPORTANT** information.
2. Amounts are in THOUSANDS of dollars; "Revenues per FTE Student" are expressed in actual dollars.
3. Data for FY 2002-2003 are taken from all 77 Association of Independent California Colleges and Universities (AICCU) member institutions.  
In previous years, data have only been reported for 70 member institutions.
4. "Other Revenue Sources" include: sales and services of educational activities, auxiliary enterprises, hospitals, and independent operations.
5. The 1997 IPEDS Finance Survey is designed to be consistent with general financial statements. Endowment income is referred to as investment income in FY1997 through FY 2003.
6. Investment/Endowment return refers to annual income from assets including dividends, interest earnings, royalties, rent, gains (losses) etc, not the sector's total net assets.

Notes:

1. PLEASE see the footnotes for this display in the report appendix for **IMPORTANT** information.
2. Data for FY 2003 are taken from 77 Association of Independent California Colleges and Universities (AICCU) member institutions. In previous years, data has been taken from only 70 member institutions.
3. "Other Revenue Sources" include: sales and services of educational activities, auxiliary enterprises, hospitals, and independent operations.
4. The 1997 IPEDS Finance Survey is designed to be consistent with general financial statements. Endowment income is referred to as investment income in FY1997 through FY 2003.

Notes:

1. Amounts are in THOUSANDS of dollars. PLEASE see the footnotes for this display in the report appendix for **IMPORTANT** information.
2. For FY 2001 - FY 2003 total state expenditures equals institutional operating expenses (including funds appropriated on a capitation basis) plus all direct student aid plus all other direct or postsecondary education expenses (e.g. designated, restricted, etc). This calculation does not include capital expenditures. In previous years total state expenditures equaled general funds (direct aid) plus student aid plus capital appropriations plus other (e.g. pensions, benefits, state charges, etc.)

5-yr	22%	11%	25%	5%	36%	12%	26%	24%
10-yr	119	32	87	6	153	33	90	86
18-yr	135	174	144	61	110	171	129	142

## Displays 12: State Appropriation Limit

	<u>State Appropriations Limit</u>			
	<u>Ttl. SAL \$</u>	<u>Excluded \$</u>	<u>Net SAL \$</u>	<u>SAL Limit</u>
	5%	15%	-1%	26%
	69	82	62	70
	328	372	303	409

### NOTES:

1. PLEASE see the "Definitions" and "Notes and Sources" appendices for IMPORTANT information on these displays.
2. For Display 6, "Other Govt. Functions" combines the seven smallest of the State's expenditure categories.
3. For Display 10, the 39-year percent change line for "Non-gov. Cost Funds" covers only 29 years.
4. For Display 12, *State Appropriations Limit* longest period of change measured here as "16-year" actually shows 26 years of change.

**NOTES:**

1. PLEASE see the *"Definitions"* and *"Notes and Sources"* appendices for IMPORTANT information on these displays.
2. For Displays 16-18, "Total Funds" is the total of each system's I-R fund sources, as are shown in the two displays.
3. For Displays 19-27, excluded here for the UC, CSU and CCC are their respective "Other Funds" revenue sources.
4. For Displays 19-27, "Lottery" and CCC's "SSFs" are shown, respectively, only for the length of time they have existed.
5. For Displays 29-33, CCC *Special Services* and *Administration*, the category "37-year" represent changes of 35 years.
6. For Displays 29-33, UC, CSU and CCC expenditure categories are excluded if no funding is currently being allocated to them.

### NOTES:

1. PLEASE see the "Definitions" and "Notes and Sources" appendices for IMPORTANT information on these displays.
2. For Displays 34, 35 and 36-39, the CCC student fee revenues and various fee levels are shown only for the time they have existed.
3. For Displays 40, 41, and Display 42, the "35-year" change line for each program shown here reflects the earliest year of data available.
4. For Displays 44-49, "State" funds includes COFPHE, General Obligation Bonds, and Other Bonds and State Special Funds.
5. For Displays 44-49, "Total" capital outlay funds includes only State, Local and Federal Government funds.
6. For Displays 44-49, percent change for each fund source is measured from the most recent year in which funds were allocated within it.

---

## APPENDIX B: DEFINITIONS

---

**IMPORTANT NOTE:** As much as possible, the fiscal information contained in the report, and described below, is updated to account for the current disposition of 2004-05 State Budget.

---

**The Commission has used the following definitions of terms in this report:**

*Bond Funds:* The capital outlay displays identify two types of bonds “General Obligation Bonds” and “Other State Bonds.” “General Obligation Bonds” are general issue bonds that are approved by the Legislature and State voters with repayment guaranteed from the State’s general revenue source (i.e., taxes). “Other State Bonds” are revenue bonds that are sold to fund specific projects whose repayment is guaranteed by revenues that the funded project is expected to generate. Examples of the types of projects funded by revenue bonds are parking structures and dormitories. These operations charge fees to their users, and those fees are used, in part, to retire the accumulated debt of the bonds.

*Cal Grants A and B Entitlement Program, and Cal Grant A and B Competitive Program:* The Entitlement program is not limited to the number of annual awards. The Cal Grant A Entitlement Program helps needy students with the tuition and fees portion of the costs involved in attending college. The Cal Grant B Entitlement Program provides a living allowance and sometimes tuition and fee aid for low-income students. Grant winners are selected on the basis of both financial need and grade point average. The Competitive program is limited to 22,500 awards. For both Cal Grant A and B Competitive Programs, eligibility is based on financial need and academic qualification.

Cal Grant C Program helps vocational education students with tuition and training costs.

*COFPHE:* Capital outlay funds used for public higher education are defined as COFPHE. They are derived from Tidelands oil revenues and collected by the State Lands Commission.

*Continuing Education Revenue Fund:* Revenue generated by fees from the following nontraditional programs: concurrent enrollment, extension, and external degree.

*Extramural Funds (University of California):* All funds not included in the University of California’s budget; hence, the terms extramural and non-budgeted are used interchangeably. These funds include sponsored research financed by federal contracts and grants, federal appropriations for the Department of Energy Laboratories, funds related to State agency agreements, and funds from private gifts and grants. These resources are designated as extramural because, with the exception of the laboratories, they are negotiated from year to year (or are negotiated after the end of the contract or grant period) and have no permanence attached to them. They are, therefore, appropriated outside of the budget.

*Federal Mineral Tax:* Funds generated from federally leased lands used for the production of geothermal energy, oil, gas, and minerals. The federal government collects all lease revenue and turns over half to the State.

*Funded Units of Enrollment:* Government services are usually funded based on workload measures that typically are a statistical calculation of the number of clients to be served. For California public K-12 education, the unit of workload measure is “Average Daily Attendance,” or ADA. One ADA in public K-12 education equals the number of days a student attended school during an academic year (generally 182 days) divided by the number of days school was in attendance that year. A student is assumed as being in attendance for a school day if she or he is there for one session during the day.

California’s two public baccalaureate degree-granting education systems, The California State University and the University of California, use the term “full-time-equivalent” enrollment (or, FTE) to describe units of student workload measure for funding purposes for the systems. The California Community Colleges use the term “full-time-equivalent students” (or, FTES) as its

student workload measure for funding purposes. FTE student enrollment is based upon the number of course units a student enrolls in during a semester, while FTES are determined by student contact hours of classroom instruction. Though the two terms are used interchangeably here and in other most publications, it is important to note that FTE enrollment and FTES are determined through entirely different methodologies.

For the California Community College, one FTES represents 525 class (contact) hours of student instruction/activity in credit and noncredit courses. The number, 525, is derived from the fact that 175 days of instruction are required each year and a student attending three hours per day for 175 days will be in attendance for 525 hours. That is, three times 175 equals 525.

For the California State University, the term FTE enrollment is defined to be 15 semester or quarter units. Variations in the academic calendars of the campuses of the CSU are taken into consideration in the definition of the annual FTES, which is equivalent to 30 semester or 45 quarter units. With these definitions, the number of individual students on campus is difficult to determine, but the total volume of instructional activity is more accurately reflected.

For the University of California, one undergraduate FTE in the semester system is student enrollment in 15 semester units for two semesters. One graduate FTE in the semester system is student enrollment in 12 semester units for two semesters. In the quarter system, the totals are 45 undergraduate credit units and 36 graduate credit units per academic year, respectively.

*Implicit Price Deflators (IPD):* These are derived from the national income and products accounts. They are derived as the ratio of current to constant-dollar Gross Domestic Product (GDP), multiplied by 100. They are also weighted averages of the detailed price indexes used in estimating constant-dollar GDP but the indexes are combined using weights that reflect the composition of GDP in each period. Consequently, changes in IPD reflect not only changes in process but also changes in the composition of GDP. Thus, they are generally not designed to be used as measurements of price changes.

The advantage of IPDs is that since they take changing expenditure patterns into account, they

are more representative of the actual, or effective rate of inflation in the nation. These deflators are not available at the State or regional level. This limitation is a drawback for most states, however in a large state with a diversified economy such as California a national deflator is probably as representative as would be any state data-based inflation index.

The two major IPDs presented here are the Gross Domestic Product (GDP) deflator and the State and Local Government (S&LG) deflator.

*Independent Colleges: the Association of Independent California Colleges and Universities (AICCU)* supplied the information in Displays 50 through 60. AICCU membership is comprised of 77 nonprofit, degree granting, and Western Association of Schools and Colleges (WASC) accredited colleges and universities. AICCU estimates that a total of 112 degree-granting and nonprofit institutions actually operate in California. However, the vast majority of the 40 non-AICCU member institutions are either not regionally accredited or they are seminaries with a student body very different than traditional degree-granting institutions. AICCU further estimates that, of these 40 institutions, fewer than five are eligible for AICCU membership. AICCU members account for an estimated 98 percent of the independent sector's total enrollment in California postsecondary education. Student's attending AICCU institutions also receive 93 percent of the State financial assistance received by students attending an independent college or university in the state. The AICCU nonprofit independent colleges and universities should not be confused with "proprietary" schools or "for-profit" and degree-granting institutions that are not regionally accredited.

For the California specific information in Displays 50 through 57, information was compiled from 76 association member institutions. The national data on independent institutions in Displays 58-60 was taken from an information network on state assistance programs of independent accredited colleges and universities.

*Inflation Measures:* The report utilizes various statistical measurements of periodic changes in prices as a yardstick for gauging the effect of increased costs and financial obligations on funding for California's public colleges and universities,

on levels of student charges (tuition and fees), and faculty salaries. These price (inflation) indices are explained below, using information and descriptions provided by the U.S. Bureau of Labor Statistics, the California Department of Finance, and material in the book *Inflation Measures for Schools & Colleges, 2000 Update* (Research Associates of Washington, September 2000).

*U.S. CPI:* The United States Bureau of Labor Statistics "Consumer Price Index for All Urban Consumers," or U.S. CPI, is a measure of the average change in prices over time in a fixed market basket of goods and services purchased by U.S. residents. According to the Bureau, the items included in the pricing survey are: food, clothing, shelter, transportation costs, medical and dental care charges, and other goods that people buy for day-to-day living. All of the taxes directly associated with the purchase and use of items are included in the index. Items in this market basket are weighted for importance in the base year, as determined by a survey of consumer expenditures; relative weights change over time as the price of items rises more or less rapidly than the overall index. Prices are collected in 85 geographic areas around the country, utilizing more than 57,000 housing units and 19,000 retail businesses. The U.S. CPI is based on monthly pricing of the market basket and this pricing occurs throughout the entire month.

*California CPI:* The California Consumer Price Index is calculated by the State's Department of Finance, in consultation with the California Department of Industrial Relations, and is conceptually based upon the U.S. CPI. It was initially established as a population-weighted average of the five-county Los Angeles area and the 10-county San Francisco all-items survey in the late 1940s.

*HEPI:* Dr. Kent Halstead of Research Associates of Washington developed The Higher Education Price Index (HEPI). It measures the average relative level of prices for goods and services purchased by postsecondary institutions through current educational and general expenditures (E&GE). In this way, HEPI shows changes in the costs of services unique to colleges and universities (such as, faculty salaries, instructional equipment, etc.) in addition to more traditional expenditure categories, such as plant maintenance and utilities. Sponsored research, sales and ser-

vices of education departments, and other for profit or auxiliary enterprises are not included in the calculation of HEPI.

Specifically, according to Dr. Halstead, HEPI is based upon the following: (1) salaries of college personnel, from faculty and administrators to clerical and nonprofessional staff; (2) contracted services, such as data processing, communication, transportation materials and supplies, maintenance, and equipment; (3) library acquisitions; and, (4) utilities. Weights are assigned to these items representing the relative importance of each item in the current E&GE budget. These data are collected from a variety of sources, including salary surveys conducted by the American Association of University Professors and the College and University Personnel Association and U.S. CPI information from the Bureau of Labor Statistics of the U.S. Department of Labor. Information from other price indices is also in the calculation of the HEPI. These indices are discussed next.

The LPI, HEPI, Boeckh, and R&D price indices are copyrighted by Research Associates of Washington. Thus, this report will no longer show the most recent years' index values or annual percent changes values for these 3 inflation measures. *Other Price Indices:* The following price indices are also used or referenced in this report:

1. *The Academic Library Current Operations & Acquisitions Price Index (LPI).* The LPI reports the relative year-to-year price level of goods and services purchased by postsecondary institution libraries for their current operations. The priced components of LPI are organized into three parts -- personnel compensation, acquisitions and contracted services, and supplies and materials.

2. *The Elementary-Secondary School Price Index (SPI).* The SPI measures the effects of inflation on the current operations of elementary and secondary schools. It reports relative price levels that schools pay for a fixed group of goods and services for their daily operation. These expenses include administration, instruction (mostly teacher salaries), plant operation and maintenance, and other costs. Costs excluded are capital outlay and debt service.

3. *The Research and Development Price Index (R&DI).* The R&DI measures changes in the price of goods and services bought by colleges and universities through current direct expendi-

tures for sponsored research, excluding indirect (overhead) research costs charged to other departments. The direct expenditures for sponsored research priced by the R&DI consists of salaries and wages for professional and non-professional personnel, fringe benefits, contracted services, supplies and materials, and equipment.

4. *The Boeckh Construction Index (Boeckh)*. The Boeckh Division of the American Appraisal Company computes the Boeckh index. It is a measurement of inflation on building apartments, hotels and office buildings -- a mix of facilities relatively applicable to structures built on college campuses. The Boeckh index is a "fixed input" type of index of wage rates and building material prices weighted together. It covers the structural portion of building and all the integral plumbing, heating, lighting and elevators.

*Instruction-Related Activities (I-R)*: This term is used to define the average expenditures for instructional activities in the postsecondary education sectors. The public-sector information on instruction-related expenditures was initially generated for the Commission report, "Expenditures for University Instruction" (Commission Report 93-2) which contains background detail on the numbers shown here. The methodology for determining these instruction-related revenue data was developed by the Commission and the three public higher education systems, in consultation with the Department of Finance, the Office of the Legislative Analyst, and other officials involved with that research project. For the California Community Colleges and the California State University, these expenditures were determined by dividing each system's selected fund sources for a given year by their full-time-equivalent (FTE) enrollment for that year to determine average State support per funded student.

For both the Community Colleges and the State University, "State Determined Funds" (please see definition below) were used. For the University of California, a more detailed methodology was developed. In this methodology, funds not related to general campus instruction were removed prior to calculating average State support per funded student. These calculations removed expenditures for health sciences, organized research, and public service from the University's "State Determined Fund" sources. For the independent institutions surveyed here, the AICCU

used data from the "Integrated Postsecondary Education Data Survey" (IPEDS) to show total instruction-related expenditures for participating independent institutions.

*Local Revenues*: This fund source for public K-12 Education and the California Community Colleges is local property taxes, including local government agencies' debt service, excess property tax payments, and State property tax subventions. For the community colleges, these revenues also include nonresident student tuition paid by persons attending the colleges whose legal residence is in another state or country.

*Per-Capita*: Per-capita calculations divide a given data series by a defined population grouping. For Example, California Per-capita personal income is derived by dividing the State's total personal income (TPI) by its population. TPI is the sum of all of the money earned by all of the residents of the State in a given year. To calculate per-capita funding for another unit of measure (a given population group), the funding amount being used is divided by the specified population set.

*Proposition 98*: On November 8, 1988, voters of the State approved Proposition 98, the "Classroom Instructional Improvement and Accountability Act," a combined initiative constitutional amendment and statute designed to guarantee public primary, elementary, secondary and community college education (referred to as K-14) a minimum share of the State's General Fund revenues each year. Other State agencies (the departments of Developmental Service and Mental Health, the State Special Schools, and the California Youth Authority) also receive funding under Proposition 98; however, their combined share averages less than one-third of 1 percent of annual Proposition 98 funding. The initiative was later modified by provisions contained in Proposition 111, approved by the voters in June of 1990.

Under Proposition 98 C as modified by Proposition 111 C public schools and community colleges are to get the greater of: {a} in general, a set percentage of General Fund revenues (commonly referred to as "Test 1"); {b} the amount of General Funds appropriated to K-14 in the prior fiscal year, adjusted for changes in the cost-of-living (as measured by changes in State per-capita personal income) and enrollment ("Test 2"); or, {c} a third test that replaces "Test 2" in any year in which

the percentage growth in per-capita General Fund revenues from the prior year plus 0.50 percent is less than the percentage growth in State per-capita personal income (“Test 3”). Under “Test 3”, K-14 receives the same amount appropriated to it in the prior year, adjusted for changes in enrollment and per-capita General Fund revenues plus another small adjustment factor. In any year that “Test 3” is used, K-14 receives a “credit” for future revenue years in which the General Fund is larger than the difference between the “Test 3” amount and the amount that would have been appropriated under “Text 2.”

*Public Service:* For the University of California, activities funded within this category include campus public service, cooperative extension, and the contract with the Charles R. Drew University of Medicine and Science. A major component of public service is the University’s intersegmental outreach and K-14 improvement programs designed to provide assistance to K-14 students and schools to encourage more students to become qualified for higher education. Outreach includes such programs as MESA, Puente, Early Academic Outreach Programs, Community College Transfer Centers and the California Subject Matter Projects. Campus public service includes such programs as EQUALS, Lawrence Hall of Science, the California Articulation Number, Scripps Aquarium-Museum, the California State Summer School for Math and Science (a program for gifted K-12 students), and the Teratogen Registry.

*Restricted Funds:* Budgeted funds within the University of California that are not identified by a 199XX fund number and that are earmarked for specific purposes, such as hospital income for teaching hospitals, fees for University Extension courses, and room and board charges for dormitory operations are restricted funds.

*SAFCO:* Special Account For Capital Outlay. This fund is also supplied with tidelands oil revenues.

*State Appropriations Limit:* As described by the materials from the State Treasurer, the State of California is subject to an annual limit on its appropriations imposed by Article XIII B of the State Constitution, which was adopted by the State’s voters as Proposition 4 in 1979. This “State Appropriations Limit” (SAL) was significantly modified by the voters in Proposition 98

and Proposition 111 (discussed above). Nearly all-state authorizations to spend proceeds of taxes are subject to the SAL. Essentially, this phrase refers to tax revenues, some regulatory license fees, and “excess” user fees (fees collected above levels needed to provide the service for which they are being collected). “Proceeds of taxes” excludes most State subventions to local governments, tax refunds and some benefit payments, such as unemployment insurance.

Specifically excluded from the SAL are appropriations for: (1) debt service on bonds in existence prior to January 1, 1979 and those bonds approved by the voters subsequently; (2) appropriations required to comply with mandates of courts or the federal government; and (3) appropriations for “qualified” capital outlay projects and appropriations derived from State gasoline tax increases and motor vehicle weight fee increases, per Prop 111 (explained below). Several initiatives approved in recent years were specifically written to be exempt from the Article XIII limits and were structured to create new revenue sources dedicated to specific uses, such as the tobacco tax increase in Proposition 99 in 1988. The SAL may also be suspended in cases of emergency as declared by the Governor (natural disasters and civil disturbances). If the SAL is otherwise exceeded (i.e., appropriations are made over the limit on approval by a two-thirds vote of the Legislature and the Governor), the entire excess must be recaptured over the next three fiscal years by lowering State appropriations.

Originally, the SAL was based on actual fiscal year 1978-79 authorizations; however, this method changed starting in fiscal year 1991-92, because of provisions in Proposition 111. The 1991-92 SAL was recalculated based upon the 1986-87 SAL and implementing the annual adjustment procedures spelled out in Prop 111. These provisions require that the SAL in each year be based on the State limit for the prior year, adjusted annually for changes in State per-capita personal income and changes in population. When applicable, this adjustment would also account for transfers of the financial responsibility for providing public services among units of government. As amended by Prop 111, the SAL is tested (calculated) over consecutive two-year periods, with any excess “proceeds of taxes” collected over that time that fall above the combined

SALs for those two years split equally between K-14 education and refunds to taxpayers.

*State Determined Funds:* The term “State-determined funds,” as defined here, includes only those fund sources used for operating expenses for the general, non-restricted educational missions of the three public higher education systems over which they and/or the State (through the Legislature and Governor) have policy and allocation authority.

For the California Community Colleges, these funds are: State General Funds plus Local Revenues, Systemwide Student Fees (SSFs), and State School Funds, and Lottery Funds. For the California State University, these funds are: State General Funds, State University Funds, SSFs, and Lottery Funds. State University Funds are “Higher Education Fees and Income,” minus the State University Fee SSFs here; please refer to “2002-03 Governor’s Budget,” page E 70, Table 3. For the University of California, these funds are: State General Funds, General University Funds, SSFs, and Lottery Funds. General University Funds are “General Funds Income,” under the heading “University Sources”; please see “2002-03 Governor’s Budget,” page E 48, Table 3, line 69.

*State General Fund:* The State General Fund is the main account for State revenues from which appropriations for most State programs emanate. It is used to account for all revenues and activities financed by the State that are not required by law to be accounted for by any other fund. Most State expenditures are financed from the General Fund. Normally, the only difference between the General Fund and the other governmental cost funds are constitutional or statutory restrictions placed on the use of the other governmental cost funds.

*UCRP:* University of California Retirement Program (also referred to as UCRS University of California Retirement System): A retirement system set up for University of California employees.

*University Funds:* All University of California-generated income that is classified as General Purpose Resources (budgeted under a 199XX fund number) and that includes nonresident tuition; the State’s share of overhead receipts from federal contracts and grants and the Department of Energy Laboratories management fee; interest

earned on General Purpose Resource Fund balances; application fee income and income from certain other student fees and charges; and miscellaneous sources such as farm income, and sales and service income.

**The Commission uses the following acronyms and abbreviations throughout this report:**

*BLS:* The Bureau of Labor Statistics, U.S. Department of Labor

*CCC:* The California Community Colleges (the abbreviation “CCCs” also refers to the community colleges.

*COSF:* State Commission on State Finance.

*CPEC:* California Postsecondary Education Commission.

*CSAC:* The California Student Aid Commission.

*CSU:* The California State University System.

*DOF:* The California Department of Finance.

*GUF:* General University Funds (for the UC).

*LAO:* The Office of the Legislative Analyst.

*SDF:* State-Determined Funds.

*SGF:* The State General Fund.

*SSF:* Resident undergraduate Systemwide Student Fees at the three public higher education systems.

*SLIAG:* State Legalization Impact Assistance Grants.

*STRS:* State Teachers’ Retirement System.

*St./Local:* State General + Local Funds (for the CCCs).

*St.Sch’l:* The State School Fund (for the CCCs).

*SUF:* State University Funds (for the CSU).

*UC:* The University of California system.

*UCOP:* The University of California Office of the President.

**Two-letter State abbreviations:**

AL	Alabama	MT	Montana
AK	Alaska	NE	Nebraska
AZ	Arizona	NV	Nevada
AR	Arkansas	NH	New Hampshire

CA	California	NJ	New Jersey
CO	Colorado	NM	New Mexico
CT	Connecticut	NY	New York

## APPENDIX C: NOTES AND SOURCES

---

**PLEASE** see “Definitions” (Appendix B) for complete explanations of some of the abbreviations and acronyms used in this section.

**IMPORTANT NOTE:** As much as possible, the fiscal information contained in the report, and described below, was updated to account for the disposition of 2004-05 State Budget.

### DISPLAY 1

1. Some of the State agencies presently within the expenditure categories displayed here were located within other categories in past years. This occasionally results in substantial changes in funding levels within the categories, as a whole, over the years. Additionally, some entire expenditure categories were contained within other categories in earlier years’ budgets. These categories have been disaggregated here so as to maintain a consistent format for programs and categories across the many years of this display.

2. The substantial percentage increases in K-12 Education General Funds in fiscal years 1978-79 and 1979-80 were the results of the replacement of monies provided by the State to partially offset local property tax revenues lost with the passage of Proposition 13 on June 6, 1978.

3. The category “Resources” includes funding for the “California Environmental Protection Agency,” which became a separate expenditure category beginning with the 1991-92 budget. Due to its small size and the short time it has been displayed as a category, funding for this department is still included in the category “Resources” in order to maintain consistency with data presentations for earlier years.

4. The category “Business, Transportation, and Housing” includes funding for the “Trade and Commerce Agency,” which became a separate expenditure category beginning with the 1993-94 Budget. Due to its small size and the short time it has been displayed as a category, funding for this department is still included in the category “Business, Transportation, and Housing” in order to maintain consistency with data presentations for earlier years.

5. The category “General Government” is used to account for “budgetary savings” (monies allotted but not anticipated to be spent) assumed to be generated throughout all of the State’s expenditure categories. Thus, the expenditure totals in this category may fluctuate significantly from one year to the next – even to

the point of showing a budgeted negative balance for the most recent year – as more accurate information on actual expenditures becomes available.

6. It is important to note that nearly all programs in the nine State expenditure categories sometimes receive substantial funding from sources other than the State General Fund. These sources include billions of dollars in federal funding, user-fee revenues, and local property tax monies. The categories public “K-12 Education” and “Higher Education” (specifically the State’s community colleges) in particular receive billions of dollars in local tax revenues. Please see the notes for Displays 8, 9 and 10 for further information on the overall State spending plan.

7. The cumulative General Fund expenditure totals shown in Display 1 will not directly reconcile with either the “Grand” or “Budget Act” totals presented in Schedule 9 because all monies for “Capital Outlay” are not included in this display.

8. Information shown for fiscal years 2003-04 and 2004-05 was provided by the Department of Finance and reflect the appropriations levels contained in the 2004-05 Budget Act.

*Sources:* governors’ budgets and analyses, 1969-70 through 2004-05 (Schedules 9 and 3); the DOF.

---

### DISPLAY 2

1. Please see the notes for Display 1 for addition information and explanations of the data in Displays 1 through 3.

2. Information shown for fiscal years 2003-04 and 2004-05 was provided by the Department of Finance and reflect the appropriations levels contained in the 2004-05 Budget Act.

*Sources:* governors’ budgets and analyses, 1969-70 through 2004-05 (Schedules 9 and 3); the DOF.

---

### DISPLAY 3

1. Please see the notes for Display 1 for additional information and explanations of the data in Displays 1 through 3.

2. Information shown for fiscal years 2003-04 and 2004-05 was provided by the Department of Finance and reflect the appropriations levels contained in the 2004-05 Budget Act.

*Sources:* governors' budgets and analyses, 1969-70 through 2004-05 (Schedules 9 and 3); the DOF.

---

#### DISPLAY 4

1. Personnel Years (PYs) are the actual or estimated portion of a position expended for the performance of work. For example, a full-time position that was filled by an employee for half a year would result in an expenditure of 0.5 personnel years.
2. The category "Other Govt. Functions" is comprised of the five smallest State government expenditure categories in Displays 1-3. They are: "Legislative, Judicial and Executive," "State and Consumer Services," "Business, Transportation, and Housing," "Resources," and "General Government." These five categories are combined here because of their relatively small General Fund expenditures and the volatility of their individual funding levels and movement of State agencies within them for various years.
3. Beginning in fiscal year 2001-02, the Employment Development Department is accounted for in the category "Other Government Functions," as is the Labor and Workforce Development Agency.
3. Please refer to the notes in Display 1 for additional information and explanations of the data in Displays 4 and 5, particularly for the movement of state agencies and departments among the various expenditure categories over time.
4. This salary information does not include the costs of non-salary staff benefits, such as health insurance.
5. Information shown for fiscal years 2003-04 and 2004-05 are estimates and projections.

*Sources:* governors' budgets and analyses, 1969-70 through 2004-05 (Schedules 4a, 4b and Table 1); DOF.

---

#### DISPLAY 5

1. Please see the notes for Display 4 for additional information and explanations of the data in this display.
2. These dollar amounts show all position classifications. The information reflects net data after salary savings (salary savings are savings resulting from position vacancies and downgrades). This salary information does not include the costs of non-salary staff benefits, such as health insurance.
3. Information shown for fiscal years 2003-04 and 2004-05 are estimates and projections.

*Sources:* governors' budgets and analyses, 1969-70 through 2004-05 (Schedules 4a, 4b and Table 1); DOF.

---

#### DISPLAY 6

1. Please see the notes for Display 4 for additional information and explanations of the data in this display.
2. These dollar amounts show all position classifications. The information reflects net data after salary savings (salary savings are savings resulting from position vacancies and downgrades).
3. Information shown for fiscal years 2003-04 and 2004-05 are estimates and projections.

*Sources:* Sources: governors' budgets and analyses, 1969-70 through 2004-05 (Schedules 4a, 4b and Table 1); DOF.

---

#### DISPLAY 7

1. "Major" revenue sources for the State General Fund consists of major taxes and licenses; there are presently 14 listed. The largest four of these sources account for more than 97 percent of total "Major" revenues. They are: Bank and Corporation (Income) Taxes, Insurance Gross Premiums Tax, Personal Income Tax, and Retail Sales and Use Taxes.
2. "Minor" revenue sources for the State General Fund consists of revenues sources from the combination of the following five categories: "Regulatory Taxes and Licenses" (presently, there are 39 sources listed), "Revenues from Local Agencies" (14 sources), "Services to the Public" (14 sources), "Use of Property and Money" (12 sources), and "Miscellaneous" (17 sources). Presently, of the eight-dozen sources listed in these five categories, three sources account for almost 70 percent of "Minor" revenues -- "Trial Court Revenues," "Income from Pooled Money Investments," and "Revenue-Abandoned Property."
3. "Transfers and Loans," as a revenue sources for the State General Fund consists of funds moved in and out of the General Fund from presently 65 different accounts. It is possible for this revenue source to show a negative (debit) balance, because the funds are transferred out of the State General Fund into other funds are accounted for here. The transfer of resources from one fund to another is based on statutory authority or special legislative authorization.
4. The "Major," "Minor," and "Transfer and Loans" revenue sources described here for the State General Fund also provide resources for "Special Funds." The largest "Special Fund" revenue sources that do not go into the State General Fund are transportation and vehicle charges -- "Motor Vehicle License (In-Lieu) Fees," "Motor Vehicle Fuel Tax (Gasoline)," and "Motor Vehicle Registration." In 1998-99, these three combined sources, accounted for almost \$8 billion of the \$11.2 billion in "Special Funds."

5. Information shown for fiscal years 2003-04 and 2004-05 are estimates and projections.

*Sources:* governors' budgets and analyses, 1969-70 through 2004-05 (Schedules 8 and 21); DOF.

---

## DISPLAY 8

1. This display is compiled from the "Total State Spending Plan," presented in Schedule 2 of the Governor's Budget. It is constructed for informational purposes to show in one place the expenditures of all funds that are accounted for by the State. In designing Schedule 2, State officials have attempted to minimize double-counting of expenditures, misinterpretations of fund sources and balances, differences in accounting methods between funding categories and other problems impacting data consistency and accuracy.

2. The State "General Fund" is the predominant fund for financing State operations. The primary sources for the General Fund revenues are personal income taxes, sales tax and bank and corporation taxes. This display shows General Fund revenue totals and differs from the General Fund expenditure totals in Display 1. Additionally, this display's General Fund totals include fund balances, carryovers, and other unspent funds not included in Display 1.

3. "Special Funds" is a generic term used for "governmental cost funds" other than the General Fund. Governmental cost funds, generally, are funds used to account for revenues from taxes, licenses and fees where the use of such revenues is restricted by law for particular functions or activities of government, such as gasoline taxes dedicated solely to transportation programs.

4. The term "Federal Funds" describes all funds received by the State directly from an agency of the federal government but not those received through another State department.

5. "Local Property Tax Revenues" are revenues generated from assessments, or tax levies, that are enacted by local governmental units based on the value of tangible property. Locally, the monies generated by these assessments are distributed by the county auditor to cities, counties, school districts and other "special" districts, and to redevelopment agencies.

6. "Nongovernmental Cost Funds" is a category used to account for monies derived from sources other than general or special taxes, licenses, fees or other State revenues. These funds differ from "Special Fund" in that they are not generated by, nor designated for, specific governmental activities. Classifications of these funds include: Public Service Enterprise Funds, Working Capital Revolving Funds, Bond Funds, Retirement Funds, and other funds including Local Property Tax Revenues. For the purposes of this display,

local property tax revenues are displayed as a separate fund source in Displays 8 and 9; and are not included in this report as nongovernmental cost funds.

7. Only estimates of appropriations accounted for as "Nongovernmental Cost Funds" are available for fiscal years 1975-76 and 1976-77. Methodologically consistent information on nongovernmental cost funds is not available prior to the 1975-76 fiscal year.

8. Omitted from this display is the category "Selected Bond Funds," since bond proceeds are accounted for as expenditures in one or more of the other classifications in this display when debt service is paid on the bonds.

9. The information shown for fiscal years 2003-04 and 2004-05 consists of estimates from the 2004-05 Governor's Budget, updated by the Department of Finance. The Department of Finance, the Legislative Analyst's Office, and State Board of Equalization provided information for earlier years.

*Sources:* governors' budgets, 1967-68 through 2004-05, Schedules (parts A and B) and 1 (parts B and C), and for earlier years Schedules 3, 4, 5, and 6; State Board of Equalization Annual Reports; and supplemental information.

---

## DISPLAY 9

1. Please see the notes for Display 8 for additional information and explanations of the data in Displays 8 and 9.

*Sources:* governors' budgets and analyses 1967-68 through 2004-05, Schedules (parts A and B) and 1 (parts B and C), and for earlier years Schedules 3, 4, 5, and 6; State Board of Equalization Annual Reports and supplemental information.

---

## DISPLAY 10

1. Please see the notes for Display 8 for additional information and explanations of the data in this Display.

2. The "Constant 2002-03 Dollar" amounts shown here are calculated using the "State and Local Purchases" deflator; please see the notes to Display 65 for more information on this index.

*Sources:* governors' budgets and analysis, 1967-68 through 2004-05, Schedules 2 (parts A and B) and 1 (parts B and C), and for earlier years Schedules 3, 4, 5, and 6; State Board of Equalization Annual Reports, Bureau of Labor Statistics, and supplemental information.

---

## DISPLAY 11

1. Please see the definition "Proposition 98" in Appendix B of this report. The funding for Prop 98 fund-

ing shown here is on an “adjusted cash” basis, that is, these funds represent the actual amounts appropriated to the funded entities. This differs from fiscal information shown on a “budgeted basis,” where amounts shown are only the initially intended spending in a given fiscal year. Only the Prop 98 data for the budget year (2002-03) are not actual expenditure amounts.

2. For the Proposition 98 information, “Related Agencies” includes the California Youth Authority and State Special Schools. These agencies offer generally pre-college instruction to their clients, usually in consultation with State and local K-12 school officials.

3. The information shown for fiscal years 2003-04 and 2004-05 consists of estimates from the 2004-05 Governor’s Budget, updated by the Department of Finance. The Department of Finance and the Legislative Analyst’s Office provided information for earlier years.

Sources: governors’ budgets and analyses, 1980-81 through 2004-05, Schedule 13 (parts C through E) and other data tables, and supplemental information.

---

## DISPLAY 12

1. Please see the definition of “the State Appropriations Limit” (SAL) in Appendix B of this report.

2. No official “SAL Balance” was calculated for fiscal years 1978-79 and 1979-80; for fiscal years 1982-83 through 1984-85, only “NET Total SAL Appropriations” data are available.

3. The information shown for fiscal years 2003-04 and 2004-05 consists of estimates from the 2004-05 Governor’s Budget, updated by the Department of Finance. The Department of Finance and the Legislative Analyst’s Office provided information for earlier years.

Sources: governors’ budgets and analyses, 1980-81 through 2004-05, Schedule 13 (parts C through E) and other data tables, and supplemental information.

---

## DISPLAY 13

1. Displays 13 – 15 contain system-specific information for use in intrasegmental comparisons over the course of time. They display funding for purposes unique to each segments’ mission. For example, the University of California totals includes state funding for public service and research programs such as cooperative extension and agricultural research, programs whose funding is not allocated nor calculated on a per student basis. For intersegmental comparisons of funding for “like” purposes (i.e., instruction), please see Displays 16 – 18.

2. At a meeting on April 25, 1997, representatives of the University of California Office of the President

(UCOP) requested that they re-format the displays of UC-specific information shown in this years’ Fiscal Profiles report. CPEC agreed to this request, thus the presentation of UC data may not always be consistent with that shown for the other public systems. Please contact the UCOP Budget Office (510-987-9115) with questions about the UC information contained in this report.

3. “Combined Revenues” for the University equal State General Funds plus “Systemwide Student Fees” (SSF).

4. “Fund/Revenues per FTES” equal revenue sources divided by FTES; SSF are divided by “combined” revenues to determine “SSF as % of Totals.”

5. “SSF” consists of “Educational” fee, “University Registration” fee, and the “Fee For Selected Professional Students” initially established in the 1990 Budget Act for law and medical school students at UC, then expanded to include other professional schools in the 1994-95 budget.

6. Amounts shown for fiscal years 2003-04 and 2004-05 are based on the 2004-05 Regents’ Budget.

Sources: governors’ budgets and analyses, 1967-68 through 2004-05; University of California, Office of the President; and supplemental information.

---

## DISPLAY 14

1. Displays 13 – 15 contain system-specific information for use in intrasegmental comparisons over the course of time. They display funding for purposes unique to each segments’ mission. For intersegmental comparisons of funding for “like” purposes (i.e., instruction), please see Displays 16 – 18

2. The CSU’s 1998-99 State General Fund amount included approximately \$80 million in one-time monies.

3. CSU State General Funds for 1982-83 through 1987-88 are “Net General Funds,” as transmitted by the CSU Chancellor’s Office. These years’ data were recalculated to extract appropriated revenues (student fees), per a change in the State’s definition of CSU State General Funds.

4. “Systemwide Student Fees” (SSF) for the CSU consists of “State University” and “Student Services” fees. Prior to the 1975-76 fiscal year, the State University’s “Student Services” fee was entitled the “Material and Services” fee. “State University” fee was established in 1981-82, while the “Student Services” fee was abolished after 1985-86.

5. The California Maritime Academy (CMA) officially became the California State University’s (CSU) 22nd campus starting with fiscal year 1993-94, thus,

this report no longer includes a separate display for the CMA.

6. “Revenues per FTES” equals revenue sources divided by FTES; “Combined” revenues are divided by SSF to determine “SSF as % of Totals.”

7. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget. Please see the notes for Display 64 for further information on these enrollment data.

Sources: governors’ budgets and analyses; 1967-68 through 2004-05; supplemental information.

---

## DISPLAY 15

1. Displays 13 – 15 contain system-specific information for use in intrasegmental comparisons over the course of time. They display funding for purposes unique to each segments’ mission. For intersegmental comparisons of funding for “like” purposes (i.e., instruction), please see Displays 16 – 18

2. In 1991-92, the California Community College’s ADA enrollment was converted to FTE student enrollment, and is now shown as such, comparable to enrollment in UC and CSU. Part of the conversion from ADA to FTES enrollment was a policy change that affected the formula used to calculate community college’s funded enrollment. This change produced a onetime increase in FTES of approximately 12 percent in the 1991-92 fiscal year. Only “State and Local Funded” credit and noncredit FTES funded by State and local appropriations are shown here; excluded are federally and other-funded FTE enrollment. All of the measurements of funding per FTE enrollment for the community colleges use only “State and Local Funded” FTE student enrollment. Please see Display 62 for an additional breakdown of community college FTE student enrollments.

3. Beginning in 1984-85, “Combined Revenues” include monies from the “State Enrollment Fee,” which was implemented that year. These monies are not shown separately here, only as part of Combined Revenues. “State Enrollment Fee” annual totals are shown in Display 24.

4. “State and Local Funds Per FTES” include Local Revenues, as the Community Colleges’ General Fund levels are partially dependent on these local revenues.

5. Proposed “State Enrollment Fee” revenue estimates for 2002-03 are those contained in the 2004-05 Budget Act.

6. The State General Funds (SGFs) listed reflect revenues available to the Community Colleges for a particular fiscal year and may not correspond to amount appropriated to satisfy that year’s “Proposition

98 Funding Guarantee.” SGFs listed for 1995-96 include \$26 million in block grants that count toward the 1994-95 Prop. 98 funding guarantee. SGFs listed for 1996-97 include \$76.9 million in block, \$60 million for deferred maintenance, and \$20 million for Americans with Disabilities Act (ADA) facility projects. Of the \$76.9 million in block grants available for 1996-97, \$55.6 million count toward 1995-96, \$19.7 million counts toward 1994-95, and \$1.7 million counts toward 1991-92.

The 1996-97 deferred maintenance and ADA funds count towards the 1995-96 Prop. 98 funding guarantee. SGFs for 1997-98 include \$98.5 million for Instructional Equipment and Library Materials, \$10 million for Childcare Facilities, \$20 million for School Maintenance and Special Repairs, and \$1.8 million for a “State-Mandated Local Programs” deficiency. The SGFs for 1997-98 listed above count toward the 1996-97 Prop. 98 funding guarantee. SGFs for 1998-99 includes \$37.6 million in block grants for Instructional Equipment and Library Materials and \$37.6 million for Scheduled Maintenance and Special Repairs. Of the SGFs for 1998-99, \$20.5 million count toward the 1996-97 guarantee and \$54.7 million count toward 1997-98. Of the SGFs for 1999-2000, \$10.0 million in block grants for Instructional Equipment and Library Materials that count toward the 1998-99 Prop 98 funding guarantee.

7. Amounts shown for fiscal year 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors’ budgets and analyses and background information, 1967-68 through 2004-05; supplemental information.

---

## DISPLAY 16

1. Display 16 through 18, contain information on revenues used for instruction-related activities for California’s three public higher education systems in various fiscal years, by fund source and averaged over FTES enrollment for each system. Additionally, data are incorporated from the AICCU showing expenditures -- not fund sources -- for instruction-related activities at 70 or more member institutions. The public-sector information was initially generated for the Commission report, “Expenditures for University Instruction” (Commission Report 93-2) that contains background detail on the numbers shown here.

2. The methodology for determining these instruction-related revenue data was developed by the Commission and the three public higher education systems, in consultation with the Department of Finance, the Office of the Legislative Analyst, and other officials involved with that research project.

“Systemwide Student Fees,” for the purposes of this display are as follows: CCC -- the State Enrollment Fee; the CSU -- the State University Fee, and; the UC -- the “Educational,” “Registration,” and “Fee for Selected Professional School Students.”

4. Some of the totals presented here will not equal the sum of amounts listed in the columns due to rounding.

5. The general campus student fee component is derived by taking the total student fee revenue expenditures and prorating the general campus portion based on the split between general campus and health science enrollment. Beginning with 1998-99, the Professional School Fee expenditures component was disaggregated from other student fees; UC can distinguish these expenditures by school. Also beginning in 1998-99, the general campus portion of this expenditure was separated from other fee totals.

6. State General Funds used to calculate I-R revenues per FTES in 1998-99 include \$70 million in one-time funds to support core needs and State General Funds used to calculate average revenues per FTES for 2001-02 include \$107.9 million in one-time funds to support core needs.

7. Amounts shown for fiscal year 2004-05 are estimates based upon the most recent information available.

Sources: governors’ budgets and analyses, 1990-91 through 2004-05; UCOP.

---

#### **DISPLAY 17**

1. Please see the notes for Display 16 for additional information and explanations of the data in this Display.

2. Please see the first note for Display 22 for information on “NET State University Revenues.”

3. Amounts shown for fiscal year 2001-02 are estimates based upon the most recent information available.

Sources: governors’ budgets and analyses, 1990-91 through 2004-05; the CSU, Office of the Chancellor.

---

#### **DISPLAY 18**

1. For the CCC, FTES totals used in these calculations include only “State-Funded” FTES enrollment. The State General Funds shown here includes both “Local Assistance” and “State Operations” categories. Based on instructions from the Chancellor’s Office, the community colleges’ “instructional expenditures” data are calculated directly from information contained in other displays in this report – FTES enrollment information from Display 64 and system funding data from Displays 15 and 26.

2. The column “State Funds + Local Funds” consists of combined State General Funds, Local Revenues, and State School Funds -- all State-determined fund sources. State funding formulas determine the General Fund level for the California Community Colleges, based upon the level of local property tax revenues anticipated being available. Thus, only “revenues per full-time-equivalent student” enrollment for combined General Funds and Local Property Tax revenues are calculated in this report.

Sources: governors’ budgets and analyses, 1990-91 through 2004-05; CCC Chancellor’s Office.

---

#### **DISPLAY 18a**

1. For the AICCU (Independent) institutions, the “Instruction-related Expenditures per FTE Student” data and calculations are taken from Display 57. Based on definitions of the reported IPEDS data and consultations with the AICCU, it was determined that only expenditures in the following categories should be considered as related to general campus instruction: “Instruction,” “Research,” and Academic Support.” Please see the notes for display 57 for additional information on the AICCU information.

2. The AICCU provided all of the instruction-related expenditures data for member independent institutions that was available to them for this report.

3. Some of the totals presented here will not equal the sum of amounts listed in the columns due to rounding.

Sources: Association of Independent California Colleges and Universities; and Commission staff analysis.

## DISPLAY 21

1. “SSF” consist of the University’s “Educational,” “Registration,” and “Professional Students” fees, as noted under “Subtotals, mandatory systemwide and professional fees,” in Table 3 (“Income and Funds Available”) of the University’s State budget detail.

2. “General University Funds” for UC consists of “Totals, General Fund Income,” as is presented in Table 3 (“Income and Funds Available”) of the University’s State budget detail. These funds include: non-resident tuition, application and other fees, prior year fund balances, interest income on fund balances, overhead from State agency contracts, contract and grant overhead, Department of Energy overhead allowances, and other sources.

“University Special Funds” equal “Total, Special Funds Income,” minus “subtotals, mandatory systemwide and professional fees”, as presented in the University’s “Income and Funds Available,” as is presented in Table 3 (“Income and Funds Available”) of the University’s State budget detail. These funds consist chiefly of sales and services revenues from the UC teaching hospitals, sales and services related to educational activities and support activities, , endowments, contract and grant administration overhead, and other sources. This category also includes UC auxiliary enterprise revenues, which are noninstructional services provided primarily to students including: student housing, parking, intercollegiate athletics, food services, and parking operations. These auxilliary programs are self-supporting and are not subsidized by State funds.

“Extramural Funds” consists nearly entirely of Federal contracts and grants and, separately, funds from the U.S. Department of Energy fees for UC’s managing the federal nuclear laboratories, as is displayed in the “Reconciliation with Appropriations” display in the University’s State budget detail (Extramural Federal Funds-Not in State Treasury and Extramural Nonfederal Unclassified Funds).

5. “Other (Restricted) Funds” include miscellaneous funds not accounted for elsewhere in this display for various years displayed here to reconcile this chart with “Totals, Budgeted and Extramural Programs” data in UC’s State Budget detail. These monies may include UCRS funds used for general-purpose expenditures (in 1983-84 and 1989-90), “Tobacco Products Surtax” funds, “U.S. Government” funds, bond funds used for ongoing operations, and other small fund sources. No extramural funds are included in this category.

5. When viewing this chart it is important to remember that it includes fund sources used for special (“Restricted”) purposes, funds used for activities not

related to general campus activities, and funding for self-supporting activities. These restricted and/or self-supporting activities include the nearly three-quarters of funds shown here in the two categories “University Special Funds and “Extramural Funds.”

6. Information for fiscal year 2004-05 are estimates based upon information from the 2005-06 State budget.

Sources: governors’ budgets and analyses, 1967-68 through 2004-05; UCOP; and supplemental information.

---

## DISPLAY 22

1. Please see the notes for Display 21 for additional information and explanations of the data in Displays 20 and 21.

2. Information for fiscal year 2004-05 are estimates based on the 2005-06 Regents’ Budget.

Sources: governors’ budgets and analyses, 1967-68 through 2004-05; UCOP; and supplemental information.

---

## DISPLAY 23

1. “State” funds include both general and special State appropriations and contracts with State agencies.

2. “University” funds include tuition and fees and the categories “Sales and Services of Educational Activities,” “Regents Reserves,” and, for earlier years, “Organized Activities” in UC’s Financial Scheduling.

3. “Federal” funds include U.S. government appropriations and, for earlier years, federal grants and contracts for organized research, except for the “Major Energy Research and Development Administration” (Dept. of Energy) laboratories.

4. “Private” funds include gifts, contracts and grants, and endowment funds.

5. “Other” funds include local government contributions and other miscellaneous sources of revenue.

Sources: University of California Campus Financial Schedules 1D through 11D, 11C, 12D, and 13C, for years 1965-66 through 2003-04.

---

## DISPLAY 24

1. For the CSU, “NET State University Revenues” is derived from the program detail contained in the 2001-02 Governor’s Budget category is entitled “CSU Higher Education Fees and Income” (Table 3, Page E-66). This category ordinarily consists of systemwide resident student fees and nonresident tuition charges, overhead from foundation contracts and grants, non-governmental college work study, independent operations, miscellaneous, unscheduled, and unallocated

funds, and other revenues. To determine NET State University Revenues, SSFs have been extracted here and placed in a separate category.

2. CSU State General Funds for 1982-83 through 1987-88 are "Net General Funds," as transmitted by the CSU Chancellor's Office. These years' data were recalculated to extract appropriated revenues (student fees), per a change in the State's definition of CSU State General Funds

3. The California Maritime Academy officially became the 22nd campus of the CSU in fiscal year 1995-96; thus, this report no longer includes a separate display for the CMA.

4. "Systemwide Student Fees" for the CSU consists of "State University" and "Student Services" fees. Prior to the 1975-76 fiscal year, the State University's "Student Services" fee was entitled the "Material and Services" fee. "State University" fee was established in 1981-82, while the "Student Services" fee was abolished after 1985-86. Only estimates of "State University Revenues" were available for fiscal years 1968-69, 1969-70, 1972-73, and 1986-87.

5. Prior to 1970-71, the "Continuing Education Revenue Fund" was entitled "Extension Program Revenue Fund."

6. Lottery and Continuing Education support may also be found in Other Funds in addition to applicable fund. Revenue from extended education fees and lottery can be deposited into local trust accounts (Education Code Section 89721) or applicable State fund (reference Education Code 89704-CERF, and Government Code 8880.5-Lottery).

7. "Federal Funds" includes the Federal Trust Fund and other Federal Funds not deposited in the State treasury that are appropriated to the State University and not to any of its auxiliary organizations, along with various other appropriated (and some non-appropriated) federal funds.

8. "Other Funds" has primarily included auxiliary organizations, housing, parking, capital outlay funds in the operating budget, other (unclassified) funds, selected reimbursements, and special short-term funds sources such as the 1987 Higher Education Earthquake Account. As a result of a new reporting structure, beginning with 1996-97, this includes additional auxiliary organizations including intercollegiate athletics, bookstores, and university unions.

9. Periodic changes in category titles and contents in the Governor's Budgets leaves some column amounts here non-reconcilable with budget totals.

10. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: Governor's Budgets and analysis, 1970-71 through 2004-05; and the California State University Office of the Chancellor.

---

## DISPLAY 25

1. Please see the notes for Display 24 for descriptions of the funding categories shown in this display.

2. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1970-71 through 2004-05; and the CSU Office of the Chancellor.

---

## DISPLAY 26

1. For fiscal years prior to 1977-78, the category "Student Fees" includes only campus-based health, parking, and auxiliary fees and nonresident tuition. Beginning in 1984-85, only revenue from the system's mandatory "State Enrollment Fee" is included in this column.

2. Please see the fifth note for Display 15 for explanations and information on the Community Colleges' funding.

3. "Other Funds" includes various combinations of funds from the Instructional Improvement, Special Deposit, Credentials, Federal Trust, COFPHE, SAFCO, and Foster Parent Training accounts, Bond Funds, reimbursements, other federal funds (prior to 1975-76 only), and other funds.

4. Due to the inconsistent availability of these data prior to the 1978-79 fiscal year, the information shown here has been culled from several displays and tables contained in several information sources; therefore, these data are not fully reconcilable with any one source.

5. "State Enrollment Fee" revenue estimates for 2003-04 and 2004-05 are based on the 2004-05 Budget Act.

6. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05; the CCC Chancellor's Office; and supplemental sources.

---

## DISPLAY 27

1. Please see the notes for Display 26 for explanations of the categories and other important information.

2. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05; the CCC's Chancellor's Office; and supplemental sources.

---

#### **DISPLAY 28**

1. Please see the notes for Displays 20 through 27 for information on the data shown in this display.

2. Information for fiscal year 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental sources.

---

#### **DISPLAY 29**

1. "Instruction and Research" includes general purpose fund expenditures in general campus and selected health sciences instruction and departmental research.

2. "Academic Support" includes general purpose fund expenditures in the libraries, other academic support items, and teaching hospitals.

3. "Organized Research" includes expenditures for selected health sciences research, agriculture, and other research programs.

4. "Institutional Support" includes general purpose fund expenditures for student financial aid, the operation and maintenance of the campuses, administration, and other logistical support services for the State University.

5. "Provisions for Allocation" serves as a temporary repository for lump-sum allocations and is used to account for anticipated, but as yet unallocated, funding reductions.

6. The program categories "Special Regents Programs" and "Auxiliary Enterprises" are not included here, since they include only "Restricted Fund" expenditures.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental sources.

---

#### **DISPLAY 30**

1. Please see notes for Display 29 for further explanations and information on the program categories.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental sources.

---

#### **DISPLAY 31**

1. Beginning with fiscal year 1995-96 and the future, the CSU has expanded as well as reconfigured its

program categories to more closely reflect the principles and characteristics of college and university financial reporting within the context of State and federal reporting requirements. However, for the CPEC display the newly developed program category titled "Operations and Maintenance of Plant" will remain in "Institutional Support" and "Student Financial Aid" will remain in "Student Services."

2. For the CSU, "General Purpose Fund Expenditures" shown here include State General Funds and the funding source "Higher Education Fees and Income CSU." Actual CSU State General Fund allocations are lower than the totals shown here; CSU student fees and other income partially offset State General Fund allocations.

3. "Instruction" has traditionally contained expenditures for instruction (i.e., the arts, sciences, vocational/technical, remedial, etc.) and instructional support. Beginning in 1995-96, Instructional Support, newly titled "Academic Administration" has been moved to "Academic Support." In addition, supervisory coaching classification expenditures have been transferred to "Student Service."

4. "Research" category was not modified. It still contains funds for activities specifically organized to produce research whether commissioned by an agency external to CSU or budgeted by a campus or the system.

5. "Public Support" category was not modified. It still contains funds for activities for non-instructional community service programs.

6. "Academic Support" has traditionally contained funds for support services for instruction, which include libraries, media services, academic computing, ancillary support, etc. Beginning with fiscal year 1995-96, academic administration has been included in "Academic Support" and administrative computing has been moved to institutional support.

7. "Student Service" has traditionally contained funds for admission and registrar activities and activities that contribute to the social development including athletics, counseling and career guidance, student financial aid, etc. Beginning with 1995-96, supervisory coaches have been included in "Student Service."

8. "Institutional Support" contains expenditures for central executive-level activities including executive management, fiscal operations, public relations, etc. for 1995-96. In the future, institutional support will include administrative computing. Admissions expenditures have been moved to "Student Services." Though still shown under "Institutional Support" here, operations and maintenance of physical plants has moved to a new program of the same name.

9. "Provisions for Allocation" serves as a temporary repository for lump-sum allocations and is used to account for anticipated, but as yet unallocated, funding reductions. The category "Provisions for Allocations" now includes General Purpose Funds for reimbursed activities.

10. The expenditure category "Auxiliary Organizations" is not shown in this display, as there are no General Purpose Funds are allocated under it.

11. Information for fiscal years 2003-04 and 2004-05 consists of estimates from background detail to the 2002-03 budget, provided by the CSU Office of the Chancellor.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental sources.

---

### DISPLAY 32

1. Please see the notes for Display 29 for further explanation and information on this display.

2. Information for fiscal years 2003-04 and 2004-05 consists of estimates from background detail to the 2002-03 budget, provided by the CSU Office of the Chancellor.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental sources.

---

### DISPLAY 33

1. Fiscal data for the three expenditure categories shown here include both "State Operations" and "Local Assistance" expenditures.

2. Only estimates of "Apportionments" are available before 1971-72; prior to that time, CCC apportionments were included within public K-12 education totals.

3. "Special Services and Operations" was formerly entitled "Programs and Operations" and "Extended Opportunity Programs."

4. The category "Administration" was formerly entitled "Administration and Institutional Support" and prior to that "Executive." Funds for "State-Mandated Local Programs" that are accounted for in this category.

5. From 1981-82 through 1996-97, "Administration" expenses have been charged against the programs incurring the cost. For these years, administrative expenses are subtracted from "Special Services and Operations," which accounted for more than 80 percent of the charge-off. Since 1997-98 the category "Administration" consists of State Operations expenditures for "Apportionments and "Special Services, Operations and Information."

6. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05; and the CCC's Chancellor's Office.

---

### DISPLAY 34

1. UC's "Educational" Fee was initiated in 1970-71, and its "Special" fee for professional students was established 1990-91. CSU's "State University" fee began in 1981-82; and its "Student Services" fee was abolished in 1985-86.

2. For informational purposes only, UC's "Fee for Selected Professional Students" is shown here, though it does NOT apply to undergraduates.

3. The Total Fees revenues shown here do not include revenues from nonresident tuition, application fees, or other miscellaneous systemwide and campus-based fees.

4. Funds provided for Board of Governors' financial aid grants are subtracted from the community colleges' State Enrollment Fee revenues shown here.

5. Information for fiscal year 2002-03 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1970-71 through 2004-05; and UC, CSU, and CCC systemwide offices.

---

### DISPLAY 35

1. Revenues from "Total Student Charges" include the systemwide undergraduate resident student fee totals shown in Display 34 and the nonresident tuition in this display. They do not include "Application" fee revenues, but do include UC's "Fee for Selected Professional Students" and other miscellaneous systemwide or campus-based fees.

2. Funds provided for Board of Governors' financial aid grants are subtracted from the CCC State Enrollment Fee revenues shown here.

3. CCC nonresident tuition for years 1974-75 through 1980-81 are estimates. The method of computing non-resident tuition was changed in 1980. Non-resident students pay both the State enrollment fee and nonresident tuition in addition to any applicable local campus charges.

4. Resident student fee revenue estimates for 2004-05 used here are included in "Total" fees and are based upon resident student fee levels for UC, the CSU, and CCC.

5. Information for fiscal year 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1970-71 through 2004-05; and CCC, CSU and UC systemwide offices.

---

### DISPLAY 36

1. "SSFs" are paid by full-time undergraduate students enrolled for two semesters or three quarters: the "Educational" and "University Registration" fees at UC; the "Student Services" and "State University" fees at the CSU; and the "State Enrollment" fee at the CCCs.

2. Assembly Bill 1318 Assembly Bill 1318 (Ducheny, Chapter 853, Statutes of 1997) reduced systemwide undergraduate student fees at the CSU and the UC by five percent for 1998-99 and 1999-2000 fiscal years. AB 1318 also reduced the systemwide enrollment fees at the CCC from \$13 to \$12 per unit. AB 1118 (Reyes, Chapter 72, Statutes of 1999) further reduced the fees at the CSU and UC by another five percent and reduced the fees at the CCC by another dollar per unit to \$12 per unit. Nonresident students pay the systemwide fees charged to resident students plus an amount equal to the two five-percent fee reductions and the nonresident charge.

3. UC and CSU Total Fees include all mandatory systemwide and campus-based charges (health, student union, etc.) for fulltime students. Effective Fall 2001, undergraduate students must provide proof of health insurance to enroll at UC. If students purchase a campus health insurance policy, the total average fees are \$4,408 for California residents in 2002-03.

4. For the 1994-95 academic year, the UC initially collected "Educational" fees at a level 18 percent higher than 1993-94. UC then rebated the part of this increase in excess of 10 percent to students, since the UC's 1994-95 budget allocation was not reduced in midyear under the provisions of SB 1230 -- the "trigger reduction" bill. The figure shown reflects the 10-percent fee increase for 1994-95.

5. The UC Regents approved a mid-year increase in systemwide fees for 2002-03 of \$405, of which \$135 is implemented in the winter term. The remainder, \$270, is deferred to 2003-04 for implementation.

6. CCC nonresident tuition for years 1974-75 through 1980-81 are estimates. The method of computing nonresident tuition was changed in 1980. Nonresident students pay both the State enrollment fee and nonresident tuition in addition to any applicable local campus charges.

7. At the CSU, "nonresident" tuition levels are determined by multiplying each system's "per-unit"

charge by 30 semester units, to determine fulltime student charges over an academic year. The UC assesses its nonresident tuition on an annual basis. Students pay it on a quarterly or semester basis.

8. Information for fiscal year 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05; CCC, CSU and UC systemwide offices; and supplemental information.

---

### DISPLAY 37

1. Please see the notes for Display 36 for further explanation and information on this display.

2. From 1992-93 through 1995-96, the CSU and CCCs charged a "duplicate degree" tuition to incoming students who already possessed a bachelor's degree or higher. This tuition was roughly equal to the systems' respective nonresident tuition charges. The UC began charging a "duplicate degree fee" in 1994. The duplicate degree tuition expired for community college students in January 1996 and expired for the CSU and UC in August 1996.

Since 1991, the UC has charged a fee of \$376 a year (two semesters or three quarters) to all incoming law and medical students. In 1994, the "Fee for Selected Professional School Students of \$2,000 per year was charged to entering students enrolled in specified graduate programs, including: law, medicine, veterinary medicine, dentistry, and business. Beginning in 1995, entering students in these programs paid a differential fee ranging from \$3,000 to \$4,000 each year. Beginning in 1996, entering students in these programs paid a differential fee ranging from \$4,000 to \$6,000 each year. In addition, Entering students in specified graduate professional programs in optometry, pharmacy, nursing, and -- only at the Los Angeles campus -- the theater, film, and television program began paying a differential fee, which ranges from \$1,800 to \$3,000 in 1997-98.

3. "Systemwide Student Fees" (SSF) at UC and CSU are those charged to fulltime students enrolled for two academic semesters or three quarters; "Total" student fees include campus-based charges (health, student union, etc.). UC's "Special" fee for professional students is not included here; it applies to non-undergraduates (mostly law, business and medical students).

4. The CCC "State Enrollment" fee was initially established in 1984 at \$50 a semester for fulltime students and five dollars per unit for part-timers, with a \$50 per-semester cap. The 1992-93 budget established two fee policy changes for the CCCs, effective January 1, 1993: (1) a separate fee level of \$50 per unit, with

no cap, was set for students with bachelor's degrees; (2) the regular "State Enrollment" fee level of six dollars per unit, with a \$60per-semester cap, was increased to \$10 per unit, with no cap.

The 1993-94 Budget Act raised the State Enrollment Fee charge to \$13 per unit with no cap on total fees; this averages out to \$390 per year for fulltime students (two semesters, @ at 15 units per). A separate fee level of \$50 per unit for students with bachelor's degrees established by the 1992-93 Budget Act sunset on January 1, 1996.

For 1997-98 the enrollment fee was maintained at the 1996-97 level of \$13 per unit with no cap on the total. For 1998-99 enrollment fee was \$12 per unit with no cap on the total, a reduction from the 1997-98 level of \$13 per unit. The enrollment fee was further reduced to \$11 per unit for 1999-2000 with no cap on the total and has remained at that level for 2002-03.

Sources: governors' budgets and analyses, 1967-68 through 2004-05; and the CCC, CSU and UC system-wide offices.

---

#### DISPLAY 38

1. Please see the notes for Display 37 for further explanations and information about these data.
2. For all past years through 1993-94, index values were calculated to measure annual changes in California Personal Income based upon consultation with representatives of the former State Commission on State Finance (COSF), as were determinations of index values for the California Consumer Price Index (CCPI). In 1995, the California Department of Finance provided updates to the full series of price inflation indices used in this publication.
3. Only projections of percent change in the U.S. CPI, the CCPI, and California Personal Income are available for fiscal year 2002-03.

Sources: governors' budgets and analyses, 1967-68 through 2004-05; the COSF, CCC, CSU, and UC system-wide offices.

---

#### DISPLAY 39

1. Please see notes in earlier displays for explanations and information on "SSF" and "Total" student fees and Displays 65 through 67 for data on price indices, and constant dollar calculations. All student fees totals shown here are those charged on an annual basis, as approved in the 2004-05 Budget Act.
2. Fiscal year 2004-05 (FY 04) "constant" dollar amounts are calculated here using the Higher Education Price Index (HEPI) to remove the effects of price inflation over time. The FY 04 constant-dollar amounts are calculated by dividing the 2004-05 HEPI

value by the HEPI index value for each year, then multiplying the result -- the inflation factor -- by the appropriate year's number to be converted, in this case "Total Student Fees" at the University of California (UC). To get UC Total Student Fees for 1965-66 expressed in FY 04 constant dollars: divide the FY 04 HEPI index value [1.0000] by the FY 66 HEPI index value [29.8]; this yields the inflation factor for 1965-66 [7.7685]. This factor is then multiplied by the actual ("current") dollar amount of FY 66 UC Total Student Fees [\$245] to arrive at it's 1965-66 equivalent: \$1,903.29. Therefore, the 2004-05 fiscal year "constant" dollar value of actual UC Total Student Fees from fiscal year 1965-66 is \$1,903.29.

Sources: governors' budgets and analyses, 1967-68 through 2004-05; COSF and LAO; and UC, the CSU, and CCC systemwide offices.

#### DISPLAY 40

1. The Cal Grant A program began in 1955-56 as the State Scholarship Program; the Cal Grant B program began in 1969-70 as the College Opportunity Grant Program; and, the Cal Grant C program started in 1973-74 as the Occupational Education and Training Grant Program. The three programs became the Cal Grant Program in 1977-78.
2. Legislation changed the scope of the Cal Grant A and B Programs in 2000 creating two distinct programs, Entitlement and Competitive. The Cal Grant A Entitlement Program provides tuition and fee assistance to low- and middle-income students, and the Cal Grant B Entitlement Program provides access allowance and tuition & fee assistance to disadvantaged and low-income students. For both Cal Grant A and B Competitive Programs, eligibility is based on financial need and academic qualification.
3. The first year of federal funding for State Student Incentive Grants (SSIG) was 1974-75.
4. Information shown for fiscal years 2003-04 and 2004-05 consists of estimates from the 2004-05 Governor's Budget, as amended by the 2004-05 Budget Act.

Sources: Governors' Budgets and Analyses, 1969-70 through 2004-05; and CSAC.

---

#### DISPLAY 41

1. Cal Grant C provides assistance with tuition & fee and books & supplies to vocationally oriented low- and middle-income students. Eligibility is based on financial need.
2. The Cal Grant T Program, established in 1998-99, is a need-based program that provides tuition and fee assistance to students attending a teacher credential program at an approved California public or private

institution. The Cal Grant T provides tuition & fee assistance to low- and middle-income students who are enrolled in an accredited California teacher preparation program.

3. For Competitive and Entitlement award break-outs, please see the new Display 41a.

Sources: Governors' Budgets and Analyses, 1969-70 through 2004-05; and CSAC.

---

**DISPLAY 41a**

1. This new display shows new Entitlement and Competitive grant data and total Cal Grant A and B awards, including renewals, for fiscal years 2001-02 through 2003-04.

2. Fiscal year 2002-03 and 2003-04 consists of estimates from the 2004-05 Governor's May Revise Budget.

Sources: Governors' Budgets and Analyses, 1969-70 through 2004-05; and CSAC.

---

**DISPLAY 42**

1. For fiscal years 1969-70 through 1972-73, Tuition and Fee Grants under the Cal Grant B program were set at the actual level of those charges. Thus, the totals shown for these four fiscal years represent the minimum amount of grant funds provided.

2. Cal Grant A and B Entitlement and Cal Grant A and B Competitive maximum award amounts are the same

3. The final 1992-93 budget included a 15.2-percent reduction in funds for the State's student financial aid programs.

4. Starting in 1996-97, the maximum award shown is for new recipients only. Renewal recipients have the award maximum of the year they entered the program (i.e. the maximum award for renewal recipients in 1996-97 is \$5,250).

5. Please see the notes for Display 41 for information on the Cal Grant T program.

6. Entitlement Cal Grant A and B awards are same as competitive A and B awards; as of 2001-2002, "Subsistence Allowance" is known as "Access Costs," per SB 1644.

Sources: governors' budgets and analyses, 1969-70 through 2004-05; and the CSAC.

---

**DISPLAY 43**

1. The display includes all student loan programs for which CSAC/EdFund is the loan guarantor, except the Consolidation Loan Program.

2. For fiscal year 2003-04, final loan data is not available.

Sources: CSAC/EdFund, Research and Policy Analysis Department.

**DISPLAY 44**

1. COFPHE = Capital Outlay Fund for Public Higher Education.

2. State General Funds for capital outlay in the University is shown in the "COFPHE" category for years prior to 1969-70, and for years since 2000-01.

3. "General Obligation State Bonds" includes the series of higher education capital outlay bond issues approved by the voters since 1986 and other State "G.O." bonds.

4. "Other State Bonds and Special Funds" includes the Public Buildings Construction Revenue Bond Fund, High Technology Education Revenue Bonds, and other funds.

5. State funds listed in all but the most recent fiscal year reflect expenditures of all funds released to the University or committed prior to the end of the fiscal year. Because capital funds are available for expenditure on a multiyear basis, some of the data from the Governor's Budget may not correspond to Budget Act appropriations.

6. For years 2000-01 and beyond, "Other Non-State Funds" reflects only non-State funds associated with proposed State-funded projects. All prior years include non-State funds associated with proposed State-funded projects and non-State funded projects approved by the UC Regents or the campus Chancellors.

7. Information shown for fiscal year 2003-04 is from the 2004-05 governor's Budget and UCOP.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 45**

1. Please refer to the notes in Display 44 for further explanation and information.

2. Information shown for fiscal year 2004-05 is estimated.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 46**

1. State General Funds for capital outlay in the State University are shown in the "COFPHE" category for years prior to 1969-70.

2. "General Obligation State Bonds" includes the series of higher education capital outlay bond issues

approved by the voters since 1986 and other State “G.O.” bonds.

4. “Other State Bonds and Special Funds” includes revenue bonds, the Public Buildings Construction Fund, and other funds.

5. State funds listed in all but the most recent fiscal year reflect expenditures of all funds released to the CSU or committed prior to the end of the fiscal year. Because capital funds are available for expenditure on a multiyear basis, some of the data from the Governor’s Budget may not correspond to actual expenditures.

6. Information shown for fiscal year 2002-03 consists of estimates provided by the systemwide offices.

Sources: governors’ budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 58**

1. The data in Displays 58, 59 and 60 were compiled by AICCU from national information on state appropriations and enrollment of independent postsecondary institutions in other states.

2. For FY 2001 through FY 2003, "Total State Expenditures" equals institutional operating expenses (including funds appropriated on a capitation basis) plus all direct student aid plus all other direct or postsecondary education expenses (e.g. designated, restricted, etc.). This calculation does not include capital expenditures. In previous years Total State Expenditures equaled general funds (direct aid) plus student aid plus capital appropriations plus other (e.g. pensions, benefits, state charges, etc.).

---

**DISPLAY 61**

1. Please see earlier Displays for further explanation and information on Community Colleges' FTES.

2. Beginning in 2000-01, state-supported summer FTE enrollment (student credit hours) is included in the University of California's annual FTE. Annual headcount figures for the University of California do not include summer headcount

3. Included here -- and in all of the enrollment displays showing the community colleges funded student enrollment -- are credit and noncredit FTES funded by State and local appropriations, as provided by the Chancellor's Office. Excluded here are federally and other-funded community college FTES.

4. The CSU headcount totals include enrollment in the system's International Program; enrollments in the CSU Statewide Nursing Program are estimated for 1988-89 and enrollment in the International Program are estimated for 1965-66 and 1966-67. Summer quarter enrollments are included from the beginning of year-round operations in 1965-66; summer quarter enrollments by level are estimated for 1965-66. FTES and headcount enrollment for the CMA -- now part of the CSU system -- are included here as of the 1993-94 fiscal year.

5. For UC and CSU, beginning in fiscal year 2001-02, funded enrollment (FTES) totals reflect substantial increases in state-supported summer term enrollments, per implementation of State policy to fully fund qualified segmental enrollment without regard to term.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 62**

1. Please see the notes for Display 61 for further explanation and information about these enrollment numbers.

2. Information shown for fiscal years 2004-05 consists of estimates from the segments' systemwide offices and the Department of Finance.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 63**

1. "Post-baccalaureate" educational credential students are included here within the "Upper Division" students' column in this display.

2. Amounts shown for fiscal year 2004-05 are estimates based upon information from the 2004-05 State budget.

3. For years beginning with 2001-02, University of California "General Campus Total" includes State Supported Summer Enrollment.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, the UC systemwide office, and supplemental information.

---

**DISPLAY 64**

1. Please see the notes for Display 61 for important information about these enrollment numbers.

2. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

3. For years beginning with 2001-02, California State University "Total Enrollment" includes State Supported Summer Enrollment.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 65**

1. Please see Appendix B, "Definitions," for a complete description of the "Implicit Price Deflators," particularly the "State and Local Government" deflator.

Sources: Bureau of Labor Statistics, U.S. Department of Labor; Research Associates of Washington; and California Commission on State Finance, California DOF, LAO.

---

**DISPLAY 66**

1. The 2004-05 constant-dollar inflation factors shown here are calculated by dividing each price indices' "index value" for 2004-05 by that indices' index value for each fiscal year. The resulting numbers -- each year's inflation factor -- are then multiplied by the dollar amount being measured (revenue sources, student fees, expenditure categories, etc.) for that same fiscal year to produce the number which is that dollar amount expressed in 2002-03 constant dollars. Please see the example provided in the note 2 for Display 39.

2. Please see Appendix B, "Definitions," for a full description of the United States Consumer Price Index. The United States Bureau of Labor Statistics "Consumer Price Index for All Urban Consumers," or CPI, is a measure of the average change in prices over time in a fixed market basket of goods and services purchased by U.S. residents. The U.S. CPI is measured from the 1983 federal fiscal year. The U.S. CPI values reported here are on a July 1 through June 30 fiscal year and are based on 12-month averages. This entire series of data was revised in 1995 from information provided by the California Department of Finance.

3. Please see Appendix B, "Definitions," for a full description of the California Consumer Price Index. The highlighted "California Consumer Price Index" (CCPI) inflation factors are those used for the 2002-03 constant dollar calculations presented in other displays in this report. The California CPI and California Personal Income are based on the State fiscal year; the State CPI is measured from the State 1983 fiscal year. Index values for California Personal Income were initially calculated from percent change data and were done in consultation with the Commission on State Finance and the U.S. Bureau of Labor Statistics. This entire series of data was revised this year from information provided by the California Department of Finance.

4. Please see Appendix B, "Definitions," for a full description of the "Higher Education" and "Research and Development" price indices. The HEPI and R&D price indices are shown in federal fiscal year 1983

dollars; only estimates of these indices for 2003-04 and 2004-05 are available for this report.

5. The HEPI, Boeck, and R&D price indices are copyrighted by Research Associates of Washington. Thus, this report will no longer show the most recent years' index values or annual percent changes values for these 3 inflation measures.

6. Information shown for all the price indices and personal income for fiscal years 2003-04 and 2004-05 are estimates.

Sources: Bureau of Labor Statistics, U.S. Dept. of Labor; Research Associates of Washington; and California COSF, California DOF, LAO.

---

#### **DISPLAY 67**

1. Please see the notes for Display 65 and 66 for explanations and information about these data.

2. Information shown for all the price indices and personal income for fiscal years 2003-04 and 2004-05 are estimates.

Sources: Bureau of Labor Statistics, U.S. Dept. of Labor; Research Associates of Washington; and California COSF, DOF, and LAO.

---

#### **DISPLAY 68**

1. Please see the notes from earlier Displays for explanations of the data in this display. Percent changes in "Total" State General Funds is taken from the calculations in Display 88, which are based on data in Display 13.

2. No parity adjustments were calculated for CSU for fiscal years 1965-66 and 1985-86.

3. UC's 1992-93 budgeted faculty salary adjustment includes monies for both 1991-92 and 1992-93 merit salary adjustments. CSU funded its 1991-92 merit step increases from existing resources, and anticipated doing the same for 1992-93, due to collective bargaining contractual obligations. UC's 1994-95 "Budgeted Faculty Salary Adjustment" assumes full restoration of the 3.5 percent reduction in salaries instituted in 1993-94.

4. Information for 2001-02 consists of estimates from the 2002-03 State University and University systemwide offices.

Sources: Bureau of Labor Statistics, U.S. Dept. of Labor; Research Associates of Washington; COSF; LAO; governors' budgets and analyses; Coordinating Council for Higher Education; CPEC; and other information.

---

#### **DISPLAY 69**

1. "State-Determined Funds" as defined here include only those fund sources used for the general, non-restricted educational missions of the three public higher education systems over which they and/or the State (through the Legislature and Governor) have policy and allocation authority.

2. Please see the Definitions" appendices for the full names of the fund source abbreviations used in Displays 68 through 75.

3. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: Governor's budgets and analysis, 1967-68 through 2004-05, and supplemental information.

---

#### **DISPLAY 70**

1. Please see the notes from earlier Displays for explanations of the data in this display. Please see the first footnotes for Displays 13 – 15 for important information on these data.

2. 2004-05 "constant-dollar" amounts are calculated by multiplying the appropriate year's HEPI inflation factor by the "actual" dollar amount for the fund sources shown above for each year. Please see notes for Displays 39 and 65-67 for explanations and information on the calculations used to determine constant dollar amounts.

3. "SSFs" for UC consists of UC's Education Fee, the Registration Fee, and the Professional Students Fee.

4. "GUF" includes: nonresident tuition, application and other fees, prior year fund balances, interest income on fund balances, overhead from State agency contracts, contract and grant overhead, U.S. Department of Energy overhead allowances, and other miscellaneous fund sources. Included in UC's 1991-92 GUF total is \$54.7 million that was appropriated in the 1990-91 year but not available until the next fiscal year.

5. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

#### **DISPLAY 71**

1. Please see the notes from earlier Displays for explanations of the data in this display. Please see the first footnotes for Displays 13 – 15 for important information on these data. The dollars per FTES numbers shown here are based upon calculations from the

revenue sources presented and explained in Display 70.

2. Amounts shown for fiscal year 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 72**

1. Please see the notes from earlier Displays for explanations of the data in this display. Please see the first footnotes for Displays 13 – 15 for important information on these data.

2. 2004-05 "constant-dollar" amounts are calculated by multiplying the appropriate year's HEPI inflation factor by the "actual" dollar amount for the fund sources shown above for each year. Please see notes for Displays 37 and 63-65 for explanations and information on the calculations used to determine constant dollar amounts.

3. CSU "SSF" -- disaggregated here from State University Funds -- consists of State University Fee and the Student Services Fee revenues.

4. SUF consists of nonresident tuition charges, overhead from foundation contracts and grants, private college work-study, independent operations, miscellaneous, unscheduled and unallocated funds, and other revenues.

5. Amounts shown for fiscal year 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 73**

1. Please see the notes from earlier Displays for explanations of the data in this display. Please see the first footnotes for Displays 13 – 15 for important information on these data.

2. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: Governor's budgets and analysis, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 74**

1. Please see the notes from earlier Displays for explanations of the data in this display.

2. The revenue sources shown here -- State-Determined Funds -- are those over which the State or

the CCC exercises direct control or policy setting responsibility.

3. 2004-05 "constant-dollar" amounts are calculated by multiplying the appropriate year's HEPI inflation factor by the "actual" dollar amount for the fund sources shown above for each year.

4. For fiscal years prior to 1984-85, the category "Student Fees" includes only campus-based health, parking and auxiliary fees and nonresident tuition. Beginning in 1984-85, only revenue from the system's mandatory "State Enrollment" fee is included in this column.

5. SGFs and Local (Property Tax) Revenues are combined here, as community college SGF levels are partially dependent upon the availability of these local revenues.

6. State School Funds consist of federal oil and mineral revenues.

7. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 75**

1. Please see the notes from earlier Displays for explanations of the data in this display. Please see the first footnotes for Displays 13 – 15 for important information on these data.

2. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 76**

1. "Hastings Funds" include student fee revenues, nonresident tuition, miscellaneous fees, scholarly publication income, overhead from federal contracts, prior-year fund balances, and other sources.

2. For fiscal years prior to 1987-88, "Extramural, Other Funds" includes only federal funds. Beginning in 1987-88, this category includes all current funds to be consistent with the University of California's budget detail; this change results in a onetime increase in these funds for the 1987-88 fiscal year. These sources include private gifts, contracts and grants, investment income, auxiliary enterprise income, and other miscellaneous funds.

3. Hastings College officials report that in fiscal year 1989-90 an extraordinary amount of Extramural Funds were expended to repair damage to the campus

caused by the Loma Prieta earthquake. This accounts for the large increase in spending in the category "Extramural, Other Funds" for that year.

4. Hastings College officials report that in May 2003 they issued Series 2003 Bonds for the purpose of financing the improvement, equipping, remodeling and renovation of the student residential facility known as McAllister Tower, and reimbursing project development costs associated with the planned construction of a mixed-use project on property owned by the College. This accounts for the increase in spending in the category "Extramural Funds" as follows: 2002-03 \$2,000,000; 2003-04 \$5,735,000; and 2004-05 \$217,000.

5. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget as updated by Hastings College.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, Hastings College of the Law, and supplemental information.

---

#### DISPLAY 77

1. Only fiscal data for public K-12 education is included here under the heading "Department of Education (see page "E-1" of the 2004-05 Governor's 2004-05 Budget). The report's K-12 displays exclude funding in the K-12 related categories: the Commission on Teacher Credentialing, the California State Library, the California State Summer School for the Arts, the California Occupational Information Coordinating Committee, the School Facilities Aid Program, and other entities. For years prior to 1984-85, several sources are used, thus, fund totals shown for earlier years may not reconcile with budget-document totals or any other data sources.

2. "Other State Aid" includes special funds -- such as the Tobacco Tax and Lottery Funds -- the State School funds, payments to the STRS Fund, selected capital outlay funds used for operations, and other funds. The large increase in these funds for 1985-86 is due to the advent of the "Lottery Education Fund" program.

3. "Local Tax Revenues" includes local debt service taxes, excess property taxes, State property tax subventions, and other miscellaneous local revenues. This information, includes local funding that is NOT part of the Proposition 98 funding formula, thus these totals will not reconcile with other K-12 financing displays delineating Prop 98 funding.

4. "Federal Aid" includes the Federal Trust Fund, SLIAG immigrant education monies, and other federal funds, excluding grants. Last year, these data were

revised because of the availability of updated information.

5. For years prior to 2001-02, "Other Funds" includes federal grants not included as "Federal Aid", county income, reimbursements, and other miscellaneous fund sources for various years. Beginning with fiscal year 2001-02, these funds are folded into the other categories used in this display.

6. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, DOF, Dept. of Education, and supplemental information.

---

#### DISPLAY 78

1. The category "High School" includes annual average daily attendance (ADA) from nonpublic school Special Education and other special programs.

2. For fiscal years 1967-68 through 1970-71, the ADA for all education of adults that is conducted in other program was included in the "Adult Education" category.

3. ROC / P = Regional Occupational Centers / Programs.

4. Only estimates of average daily attendance were available for the 1970-71 fiscal year.

5. "TOTAL" include Supplemental Summer School average daily attendance.

6. ADA for 1998-99 reflects the elimination of excused absences for the purpose of determining apportionment funding for school districts and county offices of education, per SB 727 (chapter 855, Statutes of 1997).

7. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses 1967-68 through 2004-05, Dept. of Finance, Dept. of Education, and supplemental information.

---

#### DISPLAY 79

1. "Combined State Aid" includes "State General Fund" and "Other State Aid," which are described in Display 78.

2. The big increase in State General Fund revenues for K-12 education in the 1978-79 fiscal year was in response to the substantial decline in property tax revenues -- a large portion of which goes to public education -- that resulted from the passage of the prop-

erty tax-cutting voter initiative Proposition 13 in June 1978.

3. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses 1967-68 through 2004-05, Dept. of Education, and supplemental information.

---

#### **DISPLAY 80**

1. Please see the notes for Displays 77-79 for explanations and additional information on the data in this display.

2. The "per-capita" appropriations shown in Display 80-86 are calculated by dividing the education systems' appropriations data by California's population. The result is an average amount of State Funds and "combined" State and other funds appropriated to the respective education systems for each person living in the State.

3. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget. Estimates of State population for recent years were obtained from the Demographic Research Unit of the Dept. of Finance.

Sources: governors' budgets and analyses 1967-68 through 2004-05, Dept. of Education, and supplemental information.

---

#### **DISPLAY 81**

1. Please see the notes for Displays 21 and 80 for explanations and additional information on the data in this display.

2. "State Appropriations" includes State General Funds and Lottery Funds appropriated to the UC and "SSF" for UC consists of Education and Registration fees and the Professional Students fee.

3. Amounts shown for fiscal year 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

#### **DISPLAY 82**

1. Please see the notes for Displays 24 and 80 for explanations and additional information on the data in this display.

2. "State Appropriations" includes State General Funds and Lottery Funds appropriated to the CSU.

3. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

#### **DISPLAY 83**

1. Please see the notes for Displays 26 and 80 for explanations and additional information on the data in this display.

2. "State Approp's and Local Funds" includes State General Funds, Local Property Tax Revenues, and Lottery Funds appropriated to the CCCs.

3. To maintain consistency with the per-capita information shown for the CSU and UC shown in Displays 80 and 81, revenues from the "State Enrollment Fee" initiated in the 1984-85 fiscal year are included for the CCCs.

4. Information shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

#### **DISPLAY 84**

1. Please see the notes for Displays 80 through 83 for explanations and information on these numbers.

2. For K-12 Schools and the CCCs, appropriations include State and Local revenues, including State Aid for K-12.

3. For the CSU and UC, appropriations include State General Fund revenues and systemwide resident student fee revenues.

4. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

#### **DISPLAY 85**

1. Please see the notes for Displays 1 through 6 and 80 for explanations and information on these numbers.

2. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors' budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 86**

1. Please see the notes for Display 66 for explanations and information on California Personal Income, index values and inflation factors.
2. Inflation factors used to calculate California Per-Capita Personal Income in 2002-03 “constant-dollars” are from the California Consumer Price Index (CCPI), from Display 64.
3. Please see Appendix B, “Definitions,” for a full description of Total California Personal Income, Per-Capita personal Income, and calculations of index values and inflation factors.
4. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: Bureau of Labor Statistics, U.S. Dept. of Labor; and California COSF, California DOF.

---

**DISPLAY 87**

1. “Caseload” expenditures for the State of California are calculated by dividing the combined total of State General Funds, Local Property Tax Revenues, and Nongovernmental Cost Funds (see Displays 8 and 9) by the State population (see Display 80). These particular fund sources are included here because they are general in use and are not dedicated to specific purposes, as is the case with “Special Funds” and “Federal Funds.”
2. “Caseload” expenditures for the California Public Higher Education are calculated by dividing the public systems’ respective “State Appropriations” funds (see Displays 81 – 83) by the their total headcount enrollment (see Display 88).
3. “Caseload” expenditures for the California Public K-12 Education are calculated by dividing K-12 total State and Local appropriations by headcount enrollment (see Displays 77 - 79).
4. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors’ budgets and analyses, 1967-68 through 2004-05; Dept. of Education, systemwide offices, and supplemental information.

---

**DISPLAY 88**

1. Headcount enrollment information was provided by the education systems.
2. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors’ budgets and analyses, 1967-68 through 2004-05; Department of Finance, systemwide offices, and supplemental information.

---

**DISPLAY 89**

1. Please see the notes for Display 88 for explanations and additional information on these numbers.
2. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors’ budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 90**

1. Please see the notes for Displays 8, 19, 80, and 85 for explanations and definitions of these appropriations and enrollment numbers.
2. “Total California State General Funds” is from Display 8 and “General plus Local Higher Education Funds” are from Display 19.
3. Local Revenues, primarily property taxes, for the CCCs are included in these fund-total calculations because funding formulas base General Fund allotments to the system, in part, on local revenues apportioned to the community colleges.
4. Amounts shown for fiscal years 2003-04 and 2004-05 are estimates based upon information from the 2004-05 State budget.

Sources: governors’ budgets and analyses, 1967-68 through 2004-05, and supplemental information.

---

**DISPLAY 91**

1. The states shown here are those with the largest population as of the 2000 census and are arranged in terms of population.
2. Per-capita expenditures are defined here as State government expenditures of selected federal, State, and local revenues averaged over the population of the state.
3. Included in Displays 91 through 95 are State appropriated funds for student aid and for governing and coordinating boards. State funds appropriated to other State agencies for ultimate allocation to universities to fund their current operations are included here; capital outlay funds are excluded. Please note that expenditures of federal funds are included in Displays 89 through 91.
4. When viewing these data it is important to remember that in addition to State-appropriated monies States rely upon several other revenue sources to fund their higher education systems. Chief among these

other sources are student tuition and fee charges and special funding sources, such as state lotteries.

5. The Census Bureau reports that the state of Pennsylvania reclassified three postsecondary institutions (Temple University, the University of Pittsburgh, and Lincoln University) from “private” to “public” in 1991. Public fund expenditures for these three institutions (as are defined by the Bureau) first impacts the calculation of per-capita spending for the state in the 1991-92 data reported here. This event accounts for the near doubling of Pennsylvania’s per-capita spending information shown in Displays 91 and 93.

6. Duplicative intergovernmental transactions are excluded here.

7. Only estimates were available for fiscal years 1968-69 and 1972-73.

8. No state-by-state information is available for 2000-01.

Source: U.S. Dept. of Commerce, Bureau of the Census publication “Government Finances,” fiscal years 1966-67 through 1996-97; information for fiscal years 1997-98 through 2001-02 was obtained via the Department’s internet website.

---

#### **DISPLAY 92**

1. Please see the notes for Display 91 for explanations and information on these numbers.

Source: U.S. Dept. of Commerce, Bureau of the Census publication “Government Finances,” fiscal years 1966-67 through 1996-97; information for fiscal years 1997-98 through 2001-02 was obtained via the Department’s internet website.

---

#### **DISPLAY 93**

1. The states shown here are those with the largest population as of the 2000 census.

2. Per-capita expenditures are defined here as state government expenditures of selected federal, state, and local revenues averaged over the population of the state. Please note that expenditures of federal funds are included in Displays 91 and 93.

3. The 30 states shown are ranked annually in descending order of their per-capita higher education expenditures for that year.

4. When viewing these data it is important to remember that, in addition to State-appropriated monies, states rely upon several other revenue sources to fund their higher education systems. Chief among these other sources are student tuition and fee charges and special funding sources, such as state lotteries.

5. Please see the fifth note for Display 91 for important information on the per-capita expenditure data shown for the state of Pennsylvania.

6. This display has been changed from last year to now include data for years 1979-80 through 2004-05.

Source: U.S. Dept. of Commerce, Bureau of the Census publication “Government Finances,” fiscal years 1966-67 through 1996-97; information for fiscal years 1997-98 through 2001-02 was obtained via the Department’s internet website.

---

#### **DISPLAY 94**

1. Please see the second and fourth notes for Display 91 for information also applicable to this display.

2. The 35 states shown are ranked annually in descending order of their per-capita higher education expenditures for that year.

3. The information presented for fiscal year 2004-05 consists of the most recent estimates available.

Sources: “GRAPEVINE,” Illinois State University; and the Chronicle of Higher Education.

---

#### **DISPLAY 95**

1. Please see the notes for Display 94 for explanations and information on these numbers.

2. The information presented for fiscal year 2004-05 consists of the most recent estimates available.

Source: “GRAPEVINE,” Illinois State University; and the Chronicle of Higher Education.

---

#### **DISPLAY 96**

1. The term “Megastate” (coined by Neal Peirce) refers to States with annual higher education General Fund appropriations of \$1 billion or more. This display includes States appropriating \$1 billion or more in at least one year between 1985-86 and 1997-98.

2. This display has been changed from last year to now include data for years 1979-80 through 2004-05.

3. Only appropriations of State General Funds for the ongoing operations of higher education are included in this display. It is important to remember that states support higher education with a variety of fund sources not shown here, including: local tax revenues (for community colleges), student tuition and fee charges, and special funding sources (such as state lotteries), and federal funds.

4. Combined State-fund appropriations for the CSU and UC are shown as a separate entity -- “UC/CSU” -- here from the state of California, in addition to being included in the California fund totals shown. Funding for “UC/CSU” is not counted as a separate entity in the

“totals” calculations for appropriations, nor is funding for this entity included in any of the percent changes calculated in the display.

5. The information presented for fiscal year 2002-03 2004-05 consists of the most recent estimates available.

Sources: “GRAPEVINE,” Illinois State University; “State Higher Education Appropriations 2004-05,” SHEEO; and The Chronicle of Higher Education.

---

## DISPLAY 97

1. Only appropriations of State tax funds (commonly referred to as “State General Funds”) are included in this display.

2. Complete names of University of California comparison institutions: U Illinois -- the University of Illinois, Urbana/ Champaign; U Michigan -- University of Michigan, Ann Arbor; SUNY Buffalo -- State University of New York, Buffalo; U Virginia -- University of Virginia.

3. UC’s four private faculty salary comparison institutions -- the Massachusetts Institute of Technology, Harvard University, Stanford University, and Yale University -- are not shown here, as no state appropriations data were available for them.

4. Complete names of the California State University comparison institutions: Arizona SU -- Arizona State University; Cleveland SU -- Cleveland State University (Ohio); G. Mason -- George Mason University (Virginia); Georgia SU -- Georgia State University; Illinois SU -- Illinois State University; NC State U -- North Carolina State University, Raleigh; Rutgers -- Rutgers: The State University of New Jersey, Newark; SUNY, Albany -- the State University of New York, Albany; U Colorado -- University of Colorado, Denver; U Connecticut -- University of Connecticut; U Maryland -- University of Maryland, Baltimore County; U Nevada -- University of Nevada, Reno; U Texas -- University of Texas, Arlington; U Wisconsin -- University of Wisconsin, Milwaukee; Wayne SU -- Wayne State University (Michigan).

5. CSU’s five private faculty salary comparison institutions -- Bucknell University, Loyola University of Chicago, Reed College, Tufts University, and the University of Southern California -- are not shown here, as no state appropriations data are available for them.

6. No campus-specific appropriations data are available for the faculty salary comparison institutions within the Rutgers University and University of Colorado systems.

7. No campus-specific appropriations data are available for the individual SUNY campuses after fiscal year 2000-01.

8. Information shown for fiscal year 2003-04 consists of computations based upon the most recent revenue estimates available from national sources.

Sources: “GRAPEVINE,” Illinois State University; “State Higher Education Appropriations” for selected years, State Higher Education Executive Officers (SHEEO); The Chronicle of Higher Education; and, CPEC

---

## DISPLAY 98

1. Please refer to notes for Displays 65-67, and to the “Appendix B: Definitions” section of the report, for explanations and information on the CPI and HEPI.

2. Due to rounding, the numerical information on General Fund appropriations presented here may be slightly different than the U.S. Totals data shown in Display 94.

3. The index value shown for HEPI for fiscal years 2003-04 and 2004-05 are estimates; thus the percentage changes calculated for these years are also estimates.

4. The information for the 2003-04 and 2004-05 fiscal years consists of the most recent estimates available, as reported to “GRAPEVINE.”

Sources: “GRAPEVINE,” Illinois State University; The Chronicle of Higher Education; Research Associates of Washington; and CPEC.

---

## APPENDIX A

This appendix contains cumulative “percent change” information for selected periods of time, calculated from data contained in earlier displays in the report. In past years, this information was shown on individual displays. Please refer to notes for the specific displays referenced in Appendix A for further background and details on these data.
